LAKE EROSION PUMP HOUSE IN DANGER

MUSIC FESTIVAL SCORES AGAIN

Three Capacity Audiences Hear Marvellous Program Presented By Pupils Of Eight District Schools Under Baton Of Gordon L. Eaton—High School Choir Excellent.

The usual enthusiastic capacity audience was on hand last Thursday evening at Trinity Hall for the opening night of the 17th Annual Blossom Time Music Festival.

The three songs with which the Festival Chorus, conducted by Director of Music G. L. Eaton, began, gave promise of the good things to follow. They were "O Canada," "Come Loyal Hearts," and "Spring is Here." Later they presented the graceful "Amaryllis," and "Ave Maria," the last beautifully sung in Latin; which leads to the hope that in future Festivals we may hear more Latin songs. Towards the end of the evening, to further demonstrate their ability to interpret widely differing moods they sang, first, the sad little ditty, "Cock Robin," followed by Archer's light-hearted "Gavotte."

The Rhythm Band, made up of Kindergarten, and directed by Miss Dora Wilkins, as usual marched right into the hearts of the audience; while the performance on the Melody Bells by Grade I pupils

C.N.R. Will Change Watering System

Will Discontinue Use Of Old Water Tank And Feed Engines Direct From Town Mains.

Grimsby Water Commission on Tuesday night passed a motion to purchase a new truck for the use of Supt. Andy Henderson. This question has been hanging fire for the past three months, but was finally settled by the purchase of a Fargo half-ton unit from the Anderson Motor Sales for \$1,076. The tender of West End Motors for a Ford unit was for \$1,044.

Government report showed that the local water supply was tested "Good."

No decision was reached on whether the fire hydrants would be dressed up in a new coat of paint this year.

Canadian National Railway's wish to do away with their present water tank at the C.N.R. yards and instead have their stand pipe fed direct from the eight inch main on Ontario street. This old tank was erected in 1905 and is 41 years old. It has seen its best days and maintenance is very heavy, besides an engine can be watered much faster by the direct connection system. For the past four or five years the C.N.R. has been using over 4,000,000 gallons of water per year and it is intended to increase this usage.

New plants and shrubs will be purchased for the pump house park and the grounds will be floodlighted at night for the convenience of picnickers and bathers.

Supt. Andy Henderson reported that the water in the lake had receded about a foot in the past month.

Smart Pictures

The lake erosion pictures shown on this page were taken by Harold Whyte, who resides with his aunt and uncle, Hugh C. and Helen Whyte, Fairview Lakeside. This High School lad is rapidly developing into a real, smart newspaper cameraman.

Grimsby Weather

Week ending at 8 a.m., Monday, May 13, 1946.

Highest temperature 64.4

Lowest temperature 34.0

Mean temperature 50.0

Precipitation 0.25 inches

This photo was taken from the Ed. Hand pier, east of the pump house, which is right foreground. The house left foreground is at the top of the hill. You can see how the water has washed in.

Water-washed bank on the Evans farm west of the pump house, showing four large maple trees carried into the lake. In the foreground steel piling shown, giving way to extreme water pressure.

The actual lake and the steel piling that is protecting pump house and park. That crib you see is one of the old sand filters and 20 years ago was sitting pretty 75 feet in from the water's edge.

Several times in the past two years, in picture and story, The Independent has told of the great inroads and tremendous damage being created along the lake shore by erosion. The situation is getting worse instead of better, yet no municipality along the banks of Lake Ontario, from Niagara to Toronto, has made any appreciable move to protect the shoreline and the valuable property that is rapidly being washed out into the lake.

Private individuals have been making efforts to protect their lake front property, but not to much advantage because unless the shore line on either side of them is protected their work and expenditure of money is of no avail, as the water still keeps pounding the banks on either side of that protection and eventually washes in behind and the damage continues.

Several months ago an association, with a name as long as a rifle barrel, was formed. To date, all that this newspaper can find what they have accomplished in a protective measure is that they have collected \$100 from each municipality along the lake from Niagara to Toronto. If they have done anything else we would like to hear about it. They certainly have not even come to the Grimsby district and looked along the shore. If they did it was in the dark of the moon and they are keeping whatever information they obtained in the same darkness.

Grimsby citizens, and North Grimsby, are vitally affected and they had just better wake up and wake up fast or some stormy Sunday they are going to roll out of bed and find their taps waterless and their pump house with all its expensive equipment floating out in the lake.

The situation at the pump house is a real dangerous one. One that will have to be remedied immediately, no matter what the cost, otherwise this town and township are not going to have a water supply, and THEN WHAT?

The pictures on the front page of this paper tell their own story. Go down and have a look at the situation for yourself.

(Continued on page 5)

This picture shows the depth to the south that the water has washed in. Note the steel piling to the right. The water is actually 100 feet past the end of the piling. It's at the edge of the dump.

The same bank and trees showing a close up of the trees in the water. Also in the foreground the westerly end of the steel piling protecting the pump house and the intake pier.

How would you like to own some of these cottages at Grimsby Beach? 20 years ago they were 100 feet back from the lake bank. Note trees washed into the lake, also the gashed bank and fallen trees.

WAR MEMORIAL ACTION ASKED

Councillor Mitchell Brings Matter Before Council—Wants Meeting With Town Fathers—Woolverton Mountain Road Tenders Excessive—600 Yards Of Stone Has Been Quarried.

Councillor Wm. Mitchell opened up the old question of the erection of a proper War Memorial at North Grimsby council session on Saturday. For the past 15 months he has brought this question to the fore on several occasions and on Saturday very vehemently stressed the point that nothing had ever been done in the first war to memorialize the boys who had given their lives and it was time some action was taken to see that these men were not forgotten, nor the boys who gave their all in this second conflict.

Then the following motion was unanimously passed—Mitchell—McNiven—"That the Reeve try to arrange a meeting with the council of the Town of Grimsby, to consider the matter of providing a memorial to the boys who lost their lives overseas."

As Mr. Harry Tuer has disposed of five building lots on No. 8 Highway, near Park Road, council will provide water connections to these properties immediately.

(Continued on page 11)

Be More Careful With Addresses

Postmaster Bromley Draws Attention Of Public The Incorrect Manner In Which They Send Mail.

During the past war years the population of Grimsby and district has greatly increased and many properties have changed hands. These changes and increases in population have greatly added to the problems of the Post Office.

Grimsby has now reached the stage where it is not correct to address a letter to "Mr. Smith," Grimsby, nor it is correct to address letters to just Mr. So and So, Grimsby.

The area handled by the Grimsby Post Office now includes 5000 to 6000 people, and the staff cannot remember all these people.

Therefore let us request every body to have all correspondence addressed properly. If you have a box, have the NUMBER of the box put on all correspondence. If you get your mail in General Delivery, have it addressed that way; or if on a rural route have it addressed to R.R. No. 1 or 2 or whatever it is.

Putting on street addresses does not help until we get a street delivery. If a letter is addressed to a street it means that it has to be looked up in the Directory, which causes a delay.

New Block Plant Is Now Working

New Machinery Will Produce 90 Blocks An Hour—Special Liquid Accelerates Drying Process.

New machinery has arrived and been installed in the newly erected plant of the Grimsby Cement Block Co., at the corner of Clark and Robinson streets, and the factory is now in full swing manufacturing blocks of various sizes.

A new motor driven cement mixer, while it looks small in size, has plenty of capacity to keep the cement block machine supplied with ready-mixed material. The block machine will turn out 90 blocks an hour, of tightly packed cement and sand.

The materials are shovelled into a mould and tightly packed by four high-speed, pile driver type tampers, that sound like a trip-hammer at work. The material is

(Continued on page 12)

Sewage Disposal Plant Report

May 7th, 1946.

To His Worship Mayor Henry Bull and Members of Council of the Town of Grimsby, Grimsby, Ontario.

Gentlemen:

Report on Sewerage System

In accordance with your instructions conveyed to us by Mr. G. G. Bourne, Clerk and Treasurer, under date of September 15th, 1945, we have studied the existing sewerage system and the matter of further extensions thereto. Also, we have investigated thoroughly the existing sewage disposal plant and matters affecting its operation.

The results of these studies and our recommendations are contained in the following report.

General

The Town of Grimsby has long been an established centre in the fruit growing belt for which the Niagara Peninsula is famous. The population in the Town has remained comparatively steady ranging generally between 1900 and 2000 during the past 25 years to reach 2197 reported this year.

The site of the Town is on the comparatively narrow area between the south shore of Lake Ontario and the escarpment. From the lake front the surface rises on a gentle slope to reach the steeper side slopes of the escarpment. The area of the site thus described is broken by two drainage courses, both of which converge to join in

the low lying pond-like area bordering the lake between Elizabeth Street and Maple Avenue.

The larger drainage course, Forty Mile Creek, drains a surface area of 31 square miles, the major portion of which is spread over the upper levels of the escarpment south of the Town. The Creek traverses the Town in a north-easterly direction, its course broadening into a narrow flood-plain north of the Queen Elizabeth Way. The smaller drainage course to the east is separated from the lower reaches of Forty Mile Creek by a spur of higher ground marked by Ontario Street. These drainage courses, particularly in the area

between Main Street and the lake, are important drainage features that determine the pattern for future extensions to the sewerage system and strongly influence the policy that should be followed for adequate sewage disposal and sanitation in Grimsby.

Existing Sewerage System

The existing sewerage system, including the sewage disposal plant, was constructed about 1930 and serves an area of approximately 195 acres all lying south of the Canadian National Railway Company's right-of-way. The total area within the Town's present boundaries is 602 acres of which, we understand, 448 acres are assess-

able. Thus the sewerage system at present serves less than one-half the assessed acreage.

The system of sewers is what is known as a combined system, surface drainage from roofs and streets being carried in the same sewers as carry sanitary sewage and industrial wastes. In such a system the volume of flow in the sewers in wet weather is considerably increased and during heavy rains may exceed by 100 times or more the average rate of dry weather flow.

The mixed flow of storm drainage and sewage from the system is carried in a main trunk sewer northerly on Elizabeth Street to a

FACTS & FANCIES

Frank Fairborn, Jr.

GOVERNMENTAL BLUNDERING

This paper always has been and still is a staunch supporter of price controls; of the War Time Prices and Trade Board.

Despite the fact that The Independent is the biggest and best paper in Lincoln County, still we are not of sufficient mental calibre to try and solve the meat question. We will leave that up to Donald Gordon.

But we do know something about newsprint and print papers. We positively know that they are 200 per cent in shorter supply today than they were a year ago, or at any other time during the war. We are not even going to blame Donald Gordon for that, for we honestly believe that there is too much interference from Up Above, that is causing the situation.

Why were all restrictions on paper removed last December, with positively no assurance that a supply would be adequate? Price ceilings, of course, have been removed too, but how could a printer jump prices on a job when he cannot even get the paper to do the job.

From the very day that John Atkins was removed as Paper Controller, and the quotas were taken off, the supply has been getting shorter and shorter, until right now there is practically no supply.

Where is all this paper going? We know that there is a bigger demand for paper, but not of such enormity as would cause such a shortness as exists. Particularly in some lines.

Take Coated Book for instance. Up until John Atkins was relieved and controls went off, there was a fair supply of this paper and everybody got their share. Right from the very minute that John Atkins went off the job last December, there has been no Coated Book. Now where is it? Where is it going?

Wholesale houses positively are not receiving it for distribution. Now where is it going? People who seem to know, very bluntly tell us that the mills that make this type of paper are working to full capacity. Now where is the paper going? There was no scarcity to any extent when John Atkins was on the job and the controls were on.

Coated Book is not the only scarce article. Bonds, Ledgers and other types of fine grade papers in the same category. Cheap crap, sure there is lots of that. The Independent does not use that kind of paper.

Newsprint. Where? When the restrictions were removed the newspapers, particularly the backbone papers of Canada, The Weeklies, were assured that they would get equal to their quota. Where is it? Try and get it. The wholesale houses haven't got it and cannot get it. There is just enough paper in The Independent office right now to print our issue of May 30th. After that, what? Our tonnage supply that should have been delivered in April has not arrived and our wholesale house will not give us a guarantee better than June 10th, if then.

Where is this paper that is being manufactured, for it is a positive fact that it is being manufactured, GOING. This paper owes more than most people in this town own, but we are willing to gamble it all that if John Atkins had been left on the job this lousy situation would never have existed.

It is simply a case of governmental blundering on the one hand and trying to satisfy political ambitions on the other, to the detriment of the people of Canada. It could be possible that the same conditions exist in the meat situation, but not being either a farmer, a packer, or a retailer we are not in a position to say.

The hottest story of the day is the one about the enterprising lad who bought a case of cigars, had them insured against fire, passed them out to friends, put in a claim to the insurance company, sued and won. He gained very little, he was arrested for arson.

DRESS OUTLOOK

A shortage of cloth is predicted for Canada. Soon, the only suits to be found will be cases in the courts.

Signs are ominous. Soon, at this rate, there will be no more cutting in tailor shops than there is in meat stores.

The future looks dark. It seems less cloth will be worn by men from the bungalows as well as girls on the beaches.

There will still be weaving in the land, of course, but mostly in football or hockey matches.

Source of the cloth shortage is overseas, we are told. There are now fewer spinners everywhere but on the ballet circuit.

So scarce are pants that domestic science experts are pointing out that one pair of trousers makes three sets of shorts properly cut.

Canada's tax-payer can laugh at the clothing shortage now forecast. He was due to adopt the barrel suit anyway.

ARE PRICE CONTROLS NEEDED?

That is a question that has about as many answers as there are people in business. The only unanimous vote on the affirmative side comes from the poor consumer, but unfortunately the poor consumer is pretty much a forgotten man these days.

If the lid was taken off completely, just how long would it take to dissipate completely war bond savings in the purchase of even ordinary necessities, is another question of interest.

Perhaps no one knows the correct answer to either question, but a comparison of prices holding in Windsor and those in Detroit, across the boundary, where price ceilings have been largely removed, is at least illuminating.

In Windsor, soft drinks are 7c, in Detroit 10c to 15c.

Hamburgers and hot dogs are 10c in Windsor; in Detroit, 21c.

Bread in Windsor is 5c to 10c; in Detroit, 11c to 18c.

In Windsor butter is 42c to 44c; in Detroit it is 55c to 60c.

Shortening in Windsor is 17c; in Detroit, 27c.

Two-party full telephone service in Windsor is \$2.85 per month; in Detroit the charge is \$5 to \$6 per month.

Electricity for an average family of four in Windsor is \$5 to \$6 for two months; in Detroit it is \$16 to \$24 per month.

A haircut in Windsor is 50c; in Detroit it is 75c to \$1.

A shave in Windsor is 25c, while in Detroit it costs from 50c to 60c.

Good quality chocolates in Windsor are 70c per pound; in Detroit, \$1.

A downtown movie in Windsor charges 45c to 48c; in Detroit the charge is 85c.

Bus or street car fare in Windsor is 7c; in Detroit, 10c.

Meals in an ordinary good restaurant in Windsor cost 75c; in Detroit, \$1.75 to \$2.25.

Chocolate milk shakes in Windsor are 15c at the fountain; in Detroit, 25c.

The list goes on and on, but that is enough to suggest that Canada keep her price controls for a week or two yet.

SOFTENING THE ESKIMOS

What the baby bonus has done in the Land of the Midnight Sun, to all Canadian subjects, the Eskimos, is now coming to light. They are being enervated, demoralized, pauperized by the Santa Claus gift from Ottawa.

A Hudson's Bay Company factor is quoted by the United Press: "Some of the Eskimos are developing the habit of spending their time sitting around trading posts, drinking tea, smoking and gossiping. The danger is that in time they will get soft and lose their hunting, fishing and trapping skills—essentials for survival in the Barren Lands in which they live."

In which case, their allowance will be increased, making them real wards of the State.

CUT WOOD BURNS BETTER

(The Tweed News)

Fire which recently destroyed the pulpwood pile at The E. B. Eddy Company's mill in Hull drew widespread attention. To older people, it will recall the great fire of 1901 which spread across the Chaudiere bridge and engulfed portions of both Ottawa and Hull. Others will remember the fire of 1917 which destroyed the centre block of the Parliament Buildings.

Few will associate the blaze with the forest fires which annually claim one-third of all the wood taken from Canadian forests.

During the coming summer, careless smokers will destroy enough pulpwood to supply paper to every Canadian newspaper for three years. Campers will leave smouldering fires that will flare up and eat into an even greater area of forest. This is the rate at which the needless destruction of our forests goes on.

Fire-fighting services alone are not enough to curb this destruction. Much, if not most, of the task of reducing forest fires, belongs to the ordinary man who would not dream of flicking a lighted cigarette butt into the Eddy block-pile, but who thoughtlessly tosses one from the window of his car on the open road.

Advertising can be expected to provide a store with a number of new customers to replace each old one who dies or moves elsewhere.

I can tell by the garbage cans that the Willie Newsons haven't moved yet.

Eva Doucet coming down town with bundles of rhubarb under her arm. Wonder where.

If Mort Dymond doesn't quit telling The Independent staff funny stories, there will not be any staff.

Those home-made window draperies of Ollie Shaw, just one of the countless butchers. Was a smart idea.

I perceived the bones of the Quality Meat Market hanging a screen door. I noticed that the serio-comic Dunham and McCartney were present in absentia.

With a whoop and a holler, "here's your weekly stipend, Terry", this columnist walked in the Model Dairy. Instead of Terry, Mrs. Sum. walked out. Boy, was our face comical.

Overheard in Rushton's Restaurant at four p.m. on Thursday afternoon. Two of Grimsby's loveliest damsels were supping afternoon tea, that is getting to be a community habit, inquiring, "where is Main Street." Here it is.

Horse flies are getting thick. Not the kind that bet the spraying of D.D.T. will kill. The kind that bet \$2 and own the grandstand. Some day this column is going to get a horse and then be their bookmaker. We'll win more that way than the horse will win.

Town Supt. James M. Lawrie, standing on Main Street looking things over 7.30 in the morning. This is the man that Engineer J. F. MacLaren, in his Sewerage Report, told Town Council "was far above the average of the men in charge of sewage disposal plants in Ontario. And that no blame for the operation of the plant could be attached to him."

There has got to be a showdown. This column is getting too many complaints, right from Korman avenue to the eastern limits. Half-witted "motorcyclist" and hair-brained motorists, with wide open horns, are making the Sunday nights hideous. There is only one thing to do with this class of cattle and that is to slap them into a compound and put them to work, particularly where all they hear day and night is motorcycle blasts and honking horns.

Letters to the Editor

490 Sunset Street,
OTTAWA, Ont.
May 7th, 1946.

Mr. J. O. Livingston,
Editor,
"The Independent,"
GRIMSBY, Ont.

Dear "Bones":

Since returning to Ottawa on Sunday night, I have heard many favourable comments on Andy Clarke's broadcast. It certainly was a boost for the district and for Grimsby in particular.

Incidentally, you yourself did a fine job in introducing Andy. A prominent banker here in Ottawa predicts that you will receive offers from broadcasting companies as an ace announcer.

Yours sincerely,
E. J. Marsh.

Ontario Regional Office
864 Bay St., Toronto 1,
May 7th, 1946.

J. O. Livingston, Esq.,
Editor,
The Grimsby Independent,
Grimsby Ontario.

Dear Mr. Livingston,

We were very pleased to read an editorial in the Grimsby Independent, dated April 18th, entitled, "The Chamber of Commerce Is Really Dead" and we noted that you were personally interested and were willing to take some responsibility for the re-organization of your Chamber of Commerce.

As you are so doubt aware, the Canadian Chamber of Commerce is the national, voluntary federation of Boards of Trade and Chambers of Commerce across Canada, whose function is to increase the efficiency and extend the usefulness of member Boards of Trade. In addition, the Field Service Department, Ontario Regional Office of the Canadian Chamber of Commerce, is ready at all times to service Boards of Trade and Chambers of Commerce, and to render every assistance possible to communities where re-organization aid is required.

Under separate cover, we are forwarding copies of the following publications which may be of assistance to you and the members of your committee in this re-organization work:

"Organizing, Building, Maintaining"
"Building Your Community"
"Membership Campaigns"

"To Chamber of Commerce from A to Z"
Should you require a speaker at a re-organization meeting, or any further help in this very worthwhile work, please do not hesitate to get in touch with us in order that we may be able to take immediate action.

Yours sincerely,

T. H. Hamill,
Field Service Department, Canadian
Chamber of Commerce.

"nde, when are you going to play football again?"

SEWERAGE SYSTEM

sewage treatment plant located north of, and close to, the Queen Elizabeth Way and on the east bank of Forty Mile Creek. Sewage reaches the plant through a 42 inch sewer which discharges into an entrance chamber from which the flow in excess of two or three times the rate of dry weather flow is by-passed into the Creek.

We have calculated the carrying capacities of the existing sewers and the areas tributary thereto and find that in several places the sewers have insufficient capacity to take care of the flows that will occur during heavy rain storms from areas fully developed. On the whole, however, the existing sewers are adequate.

Existing Sewage Treatment Plant

The existing sewage treatment plant is located immediately to the north of the Queen Elizabeth Way on low ground adjacent to the right bank of Forty Mile Creek. The plant has been in service for about 18 years and is of the activated sludge type. The main units comprising the plant consist of the grit channels and bar screen chamber, aeration tanks and settling tank.

The grit channels, of which there are two, each 15'6" long, 2'6" wide and 2'6" deep, are arranged in parallel, their purpose being to reduce the velocity of the sewage to about 1 foot a second at which velocity the coarse grit and heavy mineral matter are deposited, the lighter suspended solids being carried along in suspension to the aeration tanks. The side wall of the channel is provided with overflow weirs over which the excess flow during times of storm is relieved through a 5 foot diameter outlet pipe to Forty Mile Creek. The combination of grit channels and overflow chamber is faulty and does not sufficiently protect the plant against high flows. The grit channels doubtless serve their purpose during dry weather flow periods but whenever the flow is increased, as it is during times of rainfall, matter previously settled out in the grit channels is washed over the weirs and into the Creek.

The arrangement of grit channels is such that they are difficult to clean as a result of which the accumulated organic matter becomes septic and affects the proper operation of the treatment plant and gives rise to odour. Following the grit channels there is a small chamber containing coarse bar racks, the purpose of which is to arrest paper, sticks and objectionable floating matter.

The aeration tanks through which the sewage passes, following the grit channel and screen chamber provide a total capacity of 13,230 cubic feet. In addition a re-aeration tank provides a capacity of 3,875 cubic feet. The tanks are equipped with porous air diffuser plates set along the bottom of the tanks through which compressed air is continuously blown to aerate the mixed liquor.

Following the aeration tanks the mixed liquor flows to a settling tank, this tank having a length of 61'5", a width of 16' and a depth of 8'6", the capacity being 8,540 cubic feet.

In the settling tanks the mixed liquor is settled, the accumulated sludge being continuously moved by a straight line scraping mechanism, of the mechanical type, along the bottom of the tank to a well at the north end. From this well a portion of the sludge is continuously removed by air lift and returned to the re-aeration tank through which it flows to the inlets of the aeration tanks to mix with the incoming fresh sewage. Compressed air for aeration and for the air lift is furnished by a 12" x 8" reciprocating compressor, belt-driven by an electric motor. The supply of air is insufficient.

As the sludge in the settling tank accumulates it has to be removed periodically by pumping, a portable pump being used for this purpose. The sludge so removed termed "waste activated sludge" is pumped to a small open type drying bed. The drying bed is too small and being open to the elements is of little use in the winter months or during wet seasons. In warm, dry weather the "waste activated sludge," if applied to the bed to a depth of 3 or 4 inches, will dry quickly (about

3 days) to a forkable consistency. The dried sludge taken from the bed is stored in a bin from where it is loaded into a truck and hauled away. The Town maintains no regular means for hauling the dried sludge from the plant and is dependent upon farmers who wish to avail themselves of the fertilizing value contained in the sludge.

The activated sludge is an excellent fertilizer and there should be no difficulty in arranging for its regular removal. However, in warm weather it cannot be exposed to the air for long without odour. Criticism of Existing System and Treatment Plant

The existing sewerage system, being a combined system, carries the mixed flow of sewage and storm water to the sewage treatment plant. It is not practical to provide capacity in a sewage treatment plant to care for the large flows from a combined system in wet weather; in consequence when the rate of flow increases beyond two or at least three times the average dry weather flow the excess must be relieved and disposed of into a drainage course or body of water.

In situations where the receiving water is a river carrying a substantial flow of water the dilution is generally sufficient to prevent nuisance. Where, however, there is very little flow, as is generally the case in Forty Mile Creek during the summer months, the discharge of storm water from combined sewers will cause nuisance. This is because solids in the sewage accumulate in the large sewers during dry weather. When the flow is increased the accumulated solids are moved along by higher velocities and the sewage treatment plant being unable to take care of the excess flow the solids pass out through the overflow into the comparatively dry creek bed where they lodge and putrefy. In addition to the putrescible organic matter thus deposited in the Creek from the sewers, the effluent from the treatment plant contains light flocc-like solids which, in the absence of sufficient dilution, add to the nuisance in the Creek.

Between the treatment plant and the lake the creek bed is broad, provides very little slope and is strewn with stones and boulders. Practically the only flow in the Creek during dry weather is the effluent from the treatment plant which forms a series of pools between which there are small trickling streams. Under these conditions the decomposition of the organic matter gives rise to objectionable odours that become a nuisance. To better the conditions in the Creek, near the plant, the Town has on occasions cleared a narrow channel along the dry watercourse to enable the effluent to reach the downstream marshy areas.

CANADA UNLIMITED*—The Formative Years

The Immigrants—by Jack Martin, O.S.A., C.P.E.

The Empire Builders

FROM THE MOORS OF SCOTLAND, the rocky coasts of Ireland, from English cities and farms they came, their hearts filled with wonder and a great hope. With them, fleeing from the hardships and oppressions of the Old World, came the sturdy countrymen of Europe.

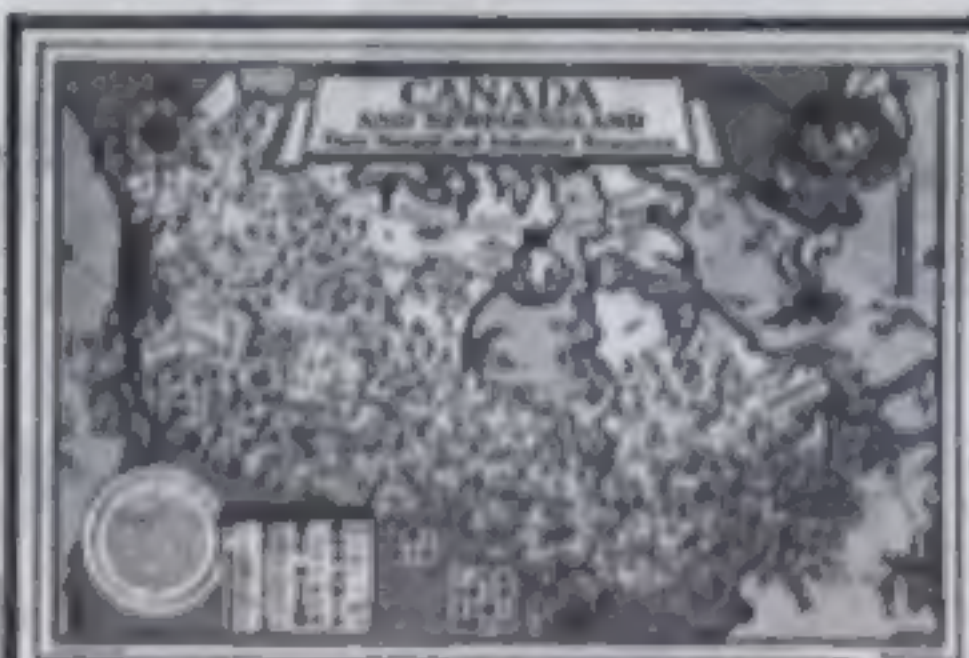

Canada! and the very name was magic. Canada, land of opportunity

... where a man's two strong hands could carve out security.

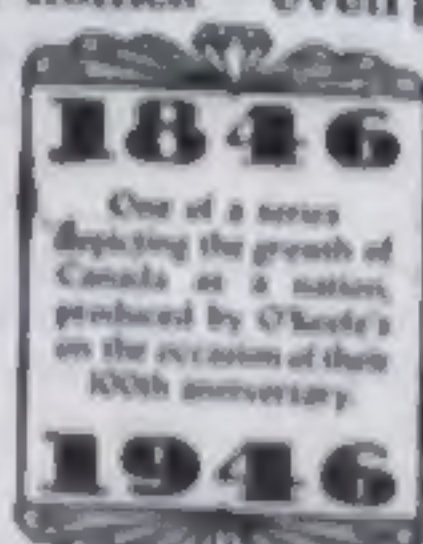

Up the mighty St. Lawrence to quaintly old-world Quebec—on through the rolling fields of Ontario—to the vast fertile miles of the Prairies—to the wooded slopes of the Rockies. And wherever they made their homes new strength was added to the bonds of blood kinship... new solidarity to the cause of Empire. Within a few short years they had become a part of the fabric of Canada, their unbounded faith in

the country of their choice justified, their dreams merged into the one dream that was to become a reality. The reality of Canada Unlimited—the Canada of today.

And the bright light of freedom and prosperity which they saw, shines today for all of us with an even greater brilliance, beckoning us to the Canada of Tomorrow... the Canada that will be more surely and swiftly ours if we give expression to our continuing faith by our purchase and holding of Victory Bonds.

SEWERAGE SYSTEM

It is unfortunate that combined sewers were installed at all in Grimsby and it is also unfortunate that the treatment plant was not located further to the north. However, the expense that would be required to rectify these adverse conditions now is out of the question and the only reasonable alternative is to adopt the separate system where sewers will be required in the future, and to enlarge and equip the existing treatment plant to ensure a high degree of treatment with a minimum of nuisance.

The means provided in the treatment plant for the drying and disposal of waste activated sludge are inadequate and objectionable odours must result under atmospheric conditions met with in warm weather. Also, the design and arrangement of the grit channels and screen chamber make these units difficult to clean. The methods employed for disposal of the detritus and screenings tend to create objectionable odours about the plant. Conditions Affecting Sewage Treatment in Grimsby

Grimsby secures its water from Lake Ontario through an 18 inch intake pipe projected about 750 feet into Lake Ontario beyond the foot of Elizabeth Street. Drainage from Grimsby and from the area drained by Forty Mile Creek reaches the lake in close proximity to the water works intake pipe. In these circumstances adequate treatment of sewage from the community is essential notwithstanding that the water supply is filtered and chlorinated.

The activated sludge process, a biological process, for which the present plant is designed is capable of treating sewage to a high degree if properly proportioned for the strength and volume of sewage to be dealt with and if properly operated.

In Grimsby the waste from canneries adds substantially to the flow and strength of the sewage during the canning season. To deal with this troublesome matter it is usual to pre-treat the waste at the source by fine screens. The latter, if properly installed and operated, prevent hulls, skins, rinds and pulp from reaching the municipal sewers and sewage treatment plant; nevertheless, the screened liquor imposes a heavy load on the treatment process.

Recommendations

Resulting from our studies of the existing treatment plant and the conditions relating to the collection, treatment and disposal of sewage in Grimsby now and in the future, we make the following recommendations:-

1. **Separate Sewers**—Any further extension to the sewerage system should be with separate sewers, all domestic sewage and industrial waste being confined to sanitary sewers. Where underground drainage for surface water from streets and roofs is required, separate storm drains should be employed.

2. **Industrial Waste**—All industrial waste from canneries, wineries or from other industries known to impose undue load on the sewage treatment plant and to adversely affect its operation and cause nuisance should be adequately treated at the source by properly operated methods and processes undertaken by the industries.

3. **Sewage Treatment Plant**—The existing sewage treatment plant should be altered and enlarged to deal with an average flow of 500,000 gallons daily with provision for further enlargement should future development in the Town require this.

The conditions imposed by the lack of dilution in Forty Mile Creek and the nature of the creek bed below the plant warrant the inclusion of an ample detritus or storm water tank at the treatment plant. Such a tank will serve to arrest a great deal of the coarse grit and floatings that are now washed into the Creek.

To deal with the heavy organic and solids content of the sewage in the canning season, a primary settling tank is justified and also additional air capacity is required.

To treat and dispose of the sludge, the mixed raw and waste activated sludge should be digested in a closed, heated digestion tank. Additional drying beds, glass covered, should be provided and arrangements made for hauling away the digested sludge for disposal on farms.

Digesting the sludge in a closed heated tank will produce a liquid sludge free from odour and of a nature that can be dried on the sand beds without nuisance. The sludge cake removed from the beds will not be as valuable as fertilizer as in the case with the dried activated sludge but nevertheless it can be used to advantage on crop or orchard lands and on gardens.

In the digestion process sufficient gas will be evolved to provide fuel for heating the digestion tank and to some extent for heating the covered drying beds should it be necessary to use these in the winter months.

The final effluent from the plant should be chlorinated with liquid chlorine.

Estimated Cost of Remodelling and Enlarging the Treatment Plant

We estimate the cost of carrying out the work herein recommended in connection with the treatment plant as follows:-

1. Alterations to inlet structure, providing new bar screen, mechanically cleaned detritus chamber or storm tank, and measuring device \$20,000.00

2. Primary settling tank, to provide 1½ hours detention for a flow of 500,000 gallons daily, equipped with mechanical scraper and sludge pump and necessary piping \$12,000.00

3. Alterations to existing aeration tanks, new air diffusers, and additional air compressor \$5,000.00

4. Alterations to existing final settling tank and overflow weir \$3,000.00

5. Digestion tank, 12,000 cubic feet capacity, equipped with heating coils, gas utilization equipment and piping \$18,000.00

6. Heating plant with gas fired hot water boiler and sludge pumps \$5,000.00

7. Chlorination equipment and chlorine contact chamber to chlorinate plant effluent \$3,500.00

8. Glass covered drying beds \$4,500.00

\$78,000.00

Add for engineering and contingencies—15% — 11,700.00

Total Estimated Cost \$89,700.00

This estimate is based on current prices at a time when the situation in the construction field is unsettled. To finance an expenditure of \$89,700.00 with debentures over a period of 15 years with interest at 5 per cent will require an annual payment in respect of interest and principal of \$7,347.89.

Results Obtained from New Plant

The work herein recommended, if carried out in its entirety to designs consistent with modern, sanitary, engineering practice, will provide the utmost that is reasonably justified to prevent the nuisance that now arises from the discharge of the storm overflow from the plant and the disposal of the plant effluent into Forty Mile Creek. Also, the effluent from the plant will be purified and disinfected to a degree justified to protect the water supply.

The sludge removed from the plant will be of a nature that can be handled and disposed of without offensive odour.

Plant Operation

The operation of the plant will require a man in attendance for 8 hours each week day. Also, it will be necessary to arrange for the dried sludge to be hauled away. The screens must be cleaned daily and the screenings along with the

grit and detritus removed and buried to prevent putrefaction and odour.

The effluent from the plant should be chlorinated continuously according to dosage and standards established by the Provincial Department of Health.

The gas utilization equipment and heating plant will be automatic in its operation but will require periodic checking and supervision.

We estimate that plant operation, inclusive of labour, power, chlorine, water for flushing, incidental supplies, repairs and maintenance, will require an expenditure of \$4,000.00 annually.

Future Sewers

We have prepared a general plan of the Town on which we have shown the existing sewers and those which, in our opinion, will be necessary to extend and expand the sewerage system to streets and areas now without sewers. It is not intended that this plan should be construed as indicating the necessity for sewers. It is only intended to be a guide should the Town wish to consider the construction of sewers in any area in the future.

We wish to point out that we have, in accordance with our recommendations, assumed that in future the construction of sewers will be along the lines of a separate system. On the plan referred to the future sanitary sewers are coloured red and the future storm sewers are coloured blue. Doubtless in some areas it will be found more

economical and advisable to construct the sanitary sewers initially, leaving to a later date the construction of storm sewers. In some instances the latter may not be required at all.

The sizes of sanitary and storm sewers indicated on the plan are sufficiently large to carry respectively the sanitary flow and storm run-off from the tributary areas when these have been fully developed. Roof drainage should not be disposed of into the sanitary sewers.

The discharge from storm drains should be disposed of into the most convenient watercourses where the latter are capable of carrying the flow without causing damage. In addition to roof drainage from buildings and surface water from streets and property, cooling water or other uncontaminated water from industries may be disposed of through the storm sewers.

In the tabulation attached hereto we have shown the estimated cost of constructing sewers in the various areas. The estimates are based on what appears to be the current rates for labour and materials but we wish to point out that present unsettled conditions make it difficult to forecast construction costs.

It is not possible to obtain gravity flow to the treatment plant from some areas in the easterly quarter of the Town and north of Main Street. The development of sewers in these areas will require that sanitary sewage be pumped.

SEWERAGE SYSTEM

On the plan we have indicated pumping station on the north side of the Queen Elizabeth Way between Maple Avenue and Robinson Street with an alternative location shown further to the north at Lake Street. In the event of sewers being constructed on Maple Avenue, Robinson Street and John Street between Main Street and the railway station the pumping station north of the Queen Elizabeth Way will be required. From this station the sanitary sewage will be pumped through a force main to the present treatment plant. If, however, it is planned to lay sanitary sewers on Maple Avenue and Ontario Street as far north as Lake Street consideration should be given to establishing the pumping station at Lake Street. The construction of either pumping station need not be an expensive matter and operation should entail little cost.

Acknowledgments

In presenting this report we wish to acknowledge, gratefully, the assistance we have received from Mr. G. G. Bourne, Clerk and Treasurer, and his staff, and from Mr. Lawrie. To all others who have assisted us we are also grateful.

All of which is respectfully submitted.

GORE & STORRIE,
J. MacLaren,
Consulting Engineers.

LAKE EROSION

All that has saved the actual pump house for the past two years is the steel inter-locking piling that ex-Mayor Hewson had put in many years ago, and at that time this job was done more for a break-water in order to build a park and beauty spot, with bathing houses, than from a lake erosion standpoint. It is a good thing that piling was put in, or the pump house would have been out in the lake months ago.

Those big trees and stumps that you see in the pictures were not so many years ago a fine row of maples on the Emma farm, standing many feet back from the lake bank. On the east side of the pump house the water is right up to the edge of the town dump. It will not be very long until the dump will be washed out and the lake will be back into the old creek bed.

The bank on the west side of the pump house is being washed away equally as fast. Soon the pump house will be on an island, then undermined, then GOODBYE.

It is cheaper to spend \$20,000, \$30,000, even \$40,000 to protect that pump house than it will be to spend \$150,000 to rebuild it some place else.

Lake erosion along the whole North Grimsby shore is tremendous. Take a look at that Grimsby Beach picture and that is only one little end of the Beach situation. At the present rate of erosion there will not be any Grimsby Beach in 15 years, the water will practically be up to the Queen Elizabeth highway.

This newspaper would like to know what has become of that long-named committee and the money they have collected and what they have done on this question, but in the meantime it is up to Grimsby to protect its pump house, no matter what the cost.

At North Grimsby council meeting on Saturday, Engineer Alex. L. Young, made a report of his findings, with regard to erosion and stated that it was his belief that if the work of constructing, piers or groynes at stated distances all along the shore line were undertaken, that some financial aid could be secured from both the Provincial and Dominion governments.

He produced an old map of the lake front and property that was drawn in 1847—59 years ago—and as near as could be figured the average amount of erosion along the lake in that period of time would be 490 feet. At the present time the township is losing 18 acres of land per year.

He estimated that groynes could be built at a cost of \$400 a piece, which if constructed 25 to the mile, for the approximate distance of five miles, along North Grimsby's shore line, the whole of the lake front could be saved from further erosion.

Oak Cutlets

"Cutlets, sir? Do you like elm or beech? We have sirloin of popular to-day, or perhaps you prefer a nice steak?"

We may hear this soon in restaurants if the report is true that the Austrian professor, Friedrich Bergius, the inventor of synthetic oil, has discovered how to make synthetic meat from wood. This meat is said to contain as much fat and albumen as ordinary meat, and to have the same calorific value.

Production of it in a Vienna factory is reported to be starting immediately, and between 60 and 100 tons a month will be produced at the start.

GRIMSBY, ONTARIO

THE PROVINCE OF PROMISE...

ONTARIO'S northern timber areas form a very important part of her natural wealth, and logging — getting the trees out for pulping — is a slow but steady operation which, while linked with progress, is still in step with nature. The processing of pulp into newsprint and a host of new and promised products is however an advanced industry upon which model towns are built and careers are launched. Ontario's forest wealth is side-kick to her mineral riches . . . more solid if less spectacular. Pulpwood and gold are each the yield of rugged country . . . each in its way beckons to the daring.

Published by THE BREWING INDUSTRY (ONTARIO)

FOREST WEALTH

An estimated 71,831,000,000 cubic feet of timber stand on Ontario's 104,000,000 acres of forested land. With a capital investment of \$250,000,000, the pulp and paper and lumber industries rank first in industrial financing. Forest industries also lead in number employed, salaries and wages paid and net value of products. Plans are afoot to: (a) train men in efficient logging methods; (b) maintain the yield of natural tree growth by reforestation; and (c) modernize wood operations with mechanical equipment.

SPORTOLOGY
(By Bones Livingston, Sportologist)
IT WILL BE A BIG SPORTS DAY for GRIMSBY, the man who has saved the Empire for KING GEORGE on several occasions reports that entries for all the classes to be competed at the LE-GION'S big sports day on May 24th are coming in fine. In fact he has so many entries in some of the classes now that he will have to run them off in divisions. The route for the five mile race and the 10 mile marathon cross country have been laid out as well as the route for the bicycle race. The west window of CURRENT AND BETZNER'S store is jammed right full of the prizes that will be donated in the various events. It is the largest and most costly collection of prizes ever gathered for one day's field sports in the history of the FRUIT BELT. Have a look at them. ... In the evening the GRIMSBY ARENA will be transformed into a huge dancing pavilion and a seven piece orchestra will provide music for a grand night of tripping the light fantastic. This will be one time that patrons of the ARENA will see OLD TOM WARNER in a dress suit. That alone will be worth the small admission fee of 35 cents.
ST. JOHN'S ARE THE CHAMPIONS — All honours to the MACKIE SISTERS and their St. John's team. They are the QUEENS of the PEACH QUEENS' league for 1945-46. They took the finals on Monday night from LITTLE MARY NORTON and her VALIANTS by 48 points on the three games. In the semi-finals they defeated the GOLDEN DROPS by 424 points. MAY STUART started the whole bowling world in the first game. Just a few minutes before play started she received a telegram that her husband PTE. ERNIE STUART had landed at Halifax from overseas. She was so excited that she trundled 296 and that was the METAL CRAFT trophy right then and there. It was a lucky telegram for ST. JOHN'S. LITTLE MARY was top score for VALIANTS with 253. ... In the semi-finals for the NIAGARA PACKERS CONSOLATION trophy the VETERANS took three straight from ELBERTA. Now the VETERANS will meet the JOHN HALENS in the finals to-night. ... The QUEENS will hold their big banquet in the OAK ROOM of the VILLAGE INN on Wednesday night, May 29th, and this affair promises to surpass all previous events that the ladies have staged. ... Yes, the SOUTH HAVENS will be present, but will OUR MARY BELL be here for the festive occasion? ... PEACH QUEENS have had a great season. Play has been very keen and on more than one occasion several of the girls have showed the way to the MEN'S LEAGUE with the high scores that they rolled. ... For the WAR SAVINGS STAMPS on Saturday, BILL HERROD grabbed the money with 360 for the men and MARY NORTON took the ladies' cash with 258. Teen-agers stamo bowling has been discontinued. ... LITTLE WHIZZER is laying in his stock getting ready for his annual hike to the northern bush.

Eggs with a smile for Britain

These are part of the 100 million eggs required to fill Canada's contract with Britain in 1946. There's a ready market, says the Dominion Department of Agriculture, for all top quality eggs that can be produced in Canada this year.

EVERY HOUSE NEEDS...

Westinghouse MODERN APPLIANCES

Coal Electric Combination

The speedy, efficient and uniform cooking results of the latest Westinghouse electric ranges combined with the comfort and economy of a wood or coal fire when you need it, make this a highly practical two-in-one range.

Comprises a spacious fire box for coal or wood—warm air ducts that heat the kitchen by air circulation—two-hole cooking top—removable ash container for greater cleanliness. Large even-heat electric oven 15" high, 17" wide and 19 1/2" deep—automatic oven heat control—two large 1800-watt and two small fast-heating 900-watt elements—smokeless broiler. Occupies a floor space 36 1/4" by 30".

THIS IS THE IDEAL RANGE FOR THE COUNTRY HOME.

OF PORTRAITURE**

Mainly For MILADY

Raison D'etre

Because her husband threw handfuls of scalloped tomatoes around the house, Mrs. Jack Simonson of Woodstock, N.B., left him. A woman can take only so much.

All For A Flash Bulb

There is a fellow in New York operating a very smooth skin game indeed, which, much and all as we'd have no truck with the trend, does at the same time give us new faith in childhood. It seems a good deal of that bobby-sox clap trap—the screaming and the swooning—does not necessarily indicate a total collapse of human intelligence. It can be a put-up job. Anyway, this youth hires himself out to theatrical performers anxious to get along and be loved for themselves alone. For a comfortable fee, he rallies neighborhood youngsters, schools them in the art of idol worship, turns them loose at the matinees to lead the crowd. They shriek, weep, faint and strangle one another in ecstasy. These little riots lure the news-mongers. Which builds publicity. Which makes popularity. Which brings money. A star is born.

"Apple Pie Order"

Did you ever wonder where the expression "apple pie order" came from? Here is one explanation which comes from U.S.A., but I rather think the expression dates much further back in the English language than that.

In the days of the Puritans, Hepsibah Morton, housekeeper of note, made a practice of baking several dozen apple pies on Saturday. These pies were supposed to last her family through the coming week. Furthermore, she saw to it that they would stretch over the period for which they were intended before placing them upon the pantry shelf she labelled each pie with the name of the day on which it was to be eaten. With this arrangement complete, her pantry was said to be in apple-pie order.

Apple-pie order is as good a thing to-day as it was back in the time when housewives baked pies by the dozens. Moreover, it applies to many things other than pies.

If we have an orderly, apple-pie arrangement of our household affairs and effects we will save valuable time and energy.

Even our time admits of apple-pie arrangement. If we plan our work and our play we can accomplish more than by the careless way of doing things when we happen to feel like it. Our time, like Hepsibah Morton's pies, will last as it should. We will accomplish more than if we had no plan for our days.

Will Gladden The Housewife

The average housewife, even in Canada, has not had much to gladden her days in recent years.

But now things seem to be coming her way. Over in Britain a new electric iron is already in production with which correct temperatures for use on a number of fabrics are obtained by dialing.

One of the special features which make this model outstanding in the development of "controlled heat" ironing is its unshrinkable sole plate. This is hot right to the outer edge, glides smoothly over the material, and is specially shaped for ironing round buttons or over pleats.

The unbreakable body is finished in primrose, vitreous enamel, and the bakelite handle is heat-resisting and heat insulating. The heat is controlled by a calibrated adjusting dial fixed on top of the iron and marked with appropriate positions for rayon, wool, silk, cotton and linen. The iron can be simply and quickly adjusted to give correct heat according to the nature of the material to be ironed.

That is not all, either. A signal lamp is built into the handle of the iron and is thermostatically controlled. The signal light glows the same as on an electric stove, until the required temperature is reached, then switches off and operates again as soon as the temperature begins to fall.

This iron weighs approximately five pounds, with a nine-foot cord lead, is nine inches long, four and a quarter inches wide and four and a half inches high.

It is for export and may possibly reach Canada about the same time men's shirts are again available on the market.

Hello Homemakers! Once upon a time the first sign of spring called for liberal dosings of sulphur and molasses, sassafras tea and other "spring tonics." Nowadays most homemakers have a speaking acquaintance with vitamins and minerals and know that throughout the year we need generous amounts of the foods which can supply these essential substances. In older times, the rundown condition from which many people suffered in the spring was actually caused by the winter's faulty diet.

Variety meats such as liver, heart and sweetbreads are an excellent source of proteins, minerals and vitamins A and B. Veal and calf liver have gained in table acceptance but few homemakers realize that beef and pork liver are actually richer in iron.

Here are some tips on preparing liver, whatever the kind, to make it tender, tasty and nourishing.

Skinning: Before cooking, slice skin from pork or mature beef liv-

er. Tender young liver—calf, lamb or baby beef—usually does not need skinning.

Scalding: Scalding improves flavor and helps "set" the juices.

Cooking: Pork liver should be thoroughly cooked and will be more delicate if braised with vegetables or made into a stew or loaf. Broil or saute young liver only long enough to take away the red color.

LIVER LOAF

1 lb. beef liver, 1 medium sized onion, chopped, 1/2 lb. pork sausage, 1 cup dry bread crumbs, 1 tsp. Worcestershire sauce, 1 tsp. lemon juice, 1 tsp. salt, 1/4 tsp. pepper, 1 tsp. celery salt, 2 beaten eggs, 1/2 cup stock, 4 slices bacon.

Cover liver with hot water; simmer 5 mins. Drain liquid and reserve for stock. Force liver and onion through food chopper, using medium blade. Add remaining ingredients except bacon. Form in loaf in 5 1/2 by 10 1/2 inch pan. Top with bacon strips. Bake in moder-

ate oven (350 deg.) 45 minutes. Serves 6 to 8.

SAUTEED HEART

Clean, wash, cut in 1/2 in. slices and soak 1 hr. in salted cold water. Sprinkle with flour or crumbs and saute slowly in baking fat (about 15 mins.)

BOILED HEART

Clean hearts. Simmer in water until tender. Split, remove gristle and chop. Season and serve on toast.

POPULAR HAM SCALLOP

3 cups diced cooked ham, 2 cups diced cooked potatoes, 1/2 cup diced celery, 3 tbsps. Peanut butter, 2 cups white sauce, salt and pepper, 1/2 cup soft bread crumbs.

Arrange alternative layers of ham, potatoes and celery in greased casserole dish. Melt the peanut butter in the white sauce and add salt and pepper. Pour over the layers of meat and vegetables and sprinkle with crumbs. Bake in an electric oven at 350 degrees for 35 mins.

Castor Oil For Beauty Treatment

Castor oil is obnoxious, sickening, gooey stuff to just about everyone but 20th Century-Fox's Jeanne Crain.

Jeanne doesn't remember who told her about it, or when or where. Sometime back in Ingwood High School days, someone mentioned that castor oil was the most penetrating of oils, and that it was wonderful for skin care.

It's wonderful all right, for the proof is in the country-fresh complexion which Techni-high-lights Jeanne Crain's excellent acting in the Rodgers and Hammerstein II film musical, "State Fair," which is the big feature at the Roxy Theatre on Monday, Tuesday and Wednesday of next week and stars Jeanne with Dana Andrews, Dick Haymes and Vivian Blaine.

Oh for the days when an emergency didn't hang on forever.

Rummage Sale

SATURDAY, MAY 18th

ALL DAY

Masonic Hall

TRINITY SERVICE CLUB

Around The GRIMSBY High School

JANIE

What's G.H.S. brushing up for now? It's the Annual Cadet Inspection May 21. First formers trying hard to get their rifles up to slope arms; drummers trying to keep in step (the little bass drummer being the only one in step); girls bellowing out commands and Sgt. "Red" strutting around, are only a few of the goings on. Don't forget, Tuesday evening 7.30 sharp, on the G.H.S. Campus. There's a dance to be held after too.

Students were a pretty dull bunch the morning after the last Festival night. Now that it's all over there will be lots of time for studying, maybe.

The magazine committee is moving away gathering material together for the Memorial magazine.

Lieut. Colonel Spicer of the R.C.A.M.C. will be conducting examinations in First Aid at the School on May 23.

There will be a Church Parade for the cadets May 21 at 11.00 a.m. to St. Andrew's Church.

The huskier boys of G.H.S. are practising up for that ten mile marathon of May 24th.

Ray, who owns that lovely lemon coloured creation that's been parked in the bike racks the last few days?

Six dashing young gallants with their pretty partners stepped out to an anniversary Dance at Central Collegiate on Friday evening.

It seems that some third form boys don't like to see the new chickens all huddled in the corners of the chicken coop—they requested Mr. Awde to break up the crap game!

Monday after school saw some fifth form "brains" writing some catchy "pomes" on the boards advertising the Cadet Dance.

Brownies

On May 7th the weatherman chased the Brownies back to their winter home.

After the Fairy Ring a new fairy gold song was learned. A number of darning tests were passed and knitting inspected. Everyone then joined in a game of "Muffin Man."

The Brownies were told of the coming visit of Lady Baden-Powell, the World Chief Guider and widow of the founder of Scouting and Guiding, who will be in Hamilton on June 8th.

On May 14th, after the usual opening a new smile song was learned.

The Brownies were taught how to clean their hands and nails, and tests were passed on Health Rules. The Golden Hand Brownies were again working on their semaphore.

A courtesy game, "Boarding Buses," was played and all joined in a folk dance.

In "Tow Wow" each Brownie was given a "Good Turn Mouse," and told about the shower of dimes to be presented to Lady Baden-Powell, which she is going to give to help feed the hungry people of Europe.

Sunday, May 19th, is Church Parade for the Brownies. They will meet at Trinity Hall at 10.40 a.m. in uniform.

TREES

I think that I shall never see A poem as lovely as a tree; A tree whose hungry mouth is pressed

Against the earth's sweet flowing breast.

A tree that looks at God all day, And lifts its leafy arms to pray.

A tree which may in summer wear A nest of robins in her hair; Upon whose bosom snow has lain

Who intimately lives with rain. Poems are made by fools like me; But only God can make a tree.

**"THAT'S
A LOAD OFF
MY
MIND!"**

Mrs. Mason's husband gets his pay in cash. Since he's working all day, his wife banks it for him, and she says she's always jittery 'til she gets it safely there. And her brother, who runs a store, says he worries too about the money from the cash register! Safeguarding your money is one of the prime services rendered by your bank.

What a relief it is when you have deposited your money in the bank! No more worry lest it should be lost or stolen! You need only keep a little ready cash in your pocket or in the house. Bills can be paid by cheque and your cancelled cheque is your receipt.

When the teller hands you your pass book, you glance at the balance and know to a cent how much money you have. You are so accustomed to your bank's accuracy that you seldom bother to check the figures.

The very fact that you—and some 5,000,000 others—take all these conveniences as a matter of course is a daily demonstration of your confidence in the dependability and efficiency of your bank.

Mrs. Wm. Stuart and Mrs. Ernie Stuart entertained at a miscellaneous shower last Wednesday in honour of Miss Georgina Marshall.

Lt. Col. and Mrs. H. C. Grant of Toronto visited Prof. and Mrs. Jackson, Main West Sunday to see the blossoms of the Niagara district.

Mr. and Mrs. E. Hyland, of Toronto, and Mr. and Mrs. Fred Hatch, of Hamilton, were Sunday visitors at the home of Mr. and Mrs. L. G. McBride.

Twenty-five children and grandchildren of the Clark clan, held a surprise party for Mrs. Emma Clark, at her home on Fairview avenue on Sunday.

Dr. and Mrs. W. Geddes, and Dr. and Mrs. Andrews of the University of Minnesota called at 165 Main West en route to the General Conference at Niagara Falls, Monday.

Dr. and Mrs. P. C. McCrostie and Prof. and Mrs. Raymen of O.A.C., Guelph, and Prof. and Mrs. Morley Jamieson of University of Manitoba made a call at 165 Main St. West Tuesday.

Mr. George Olmstead celebrated his 71st birthday last Saturday, May 11th, at the home of Mr. and Mrs. Nelson Shurt. A few of the neighbours gathered to wish Mr. Olmstead many happy returns, and presented him with a lovely birthday cake and birthday cards.

Mrs. Hillard Gibson was the hostess on Thursday last, when a pleasant social evening was spent by her neighbours, who met to shower the newly-weds, Mr. and Mrs. Norman Lunt, with many useful gifts.

Mr. and Mrs. J. Decary, Montreal, who are on their wedding trip, spent Tuesday with Mrs. G. D. Tomasso, Livingston Ave., afterwards going on to Toronto. They plan to spend some time in New York before returning to Montreal.

St. Andrew's Anglican Church honoured its ex-service men and their wives at a banquet and dance on Saturday evening, about 125 attending the event. Rev. E. A. Brooks was chairman for the evening and speakers included Walter McRae, V. H. Thompson, George Nelles and Norman Warner. Supper was served by members of the W.A. and the evening ended with dancing and bridge.

Attending the Diocesan Annual of the Women's Auxiliary to the Missionary Society of the Church of England in Canada, beginning in Christ's Church Cathedral, Hamilton, on Tuesday were the following from St. Andrew's Church: Mrs. P. V. Smith, Miss H. Walsh, Mrs. Frank Burton, Mrs. Geo. Coburn, Mrs. John Chambers, Mrs. Robt. Neale, Mrs. Wm. Lethian, Mrs. F. Lowndes, Mrs. Frank Wheeler and Mrs. Harold Matchett.

Demand for Quality Furs

RECENT auction sales of top quality Canadian wild and ranch furs sold at record prices. Fur coats for next winter such as the one this attractive model is wearing will cost more than last year. Top grade fur furs of the new types also shown here sold at about the same as 1945 prices.

In preparing for pelts for market, ranchers and trappers will benefit by the information given in the free booklet "Preparation of Pelts for the Market", issued by Dominion Department of Agriculture.

Mrs. George Warner was in St. Catharines on Tuesday, as Grimsby representative, in attendance at the annual meeting of the St. Catharines and Lincoln Children's Aid Society.

Card of Thanks

I wish to extend my heartfelt thanks and appreciation for the acts of kindness, messages of sympathy and beautiful floral offerings received from my many friends and neighbours in my sad bereavement in the loss of my dear wife, with special thanks to the Rev. W. J. Watt and the Rev. Mr. Kirk; and to all those who so kindly loaned cars.

Andrew Cloughley.

Diamond Jubilee

The diamond wedding anniversary was celebrated by Mr. and Mrs. A. H. Hermiston, of St. Andrew's avenue, when they held a reception for friends, Saturday afternoon and evening, at the Village Inn.

They were married in the Anglican Church at Listowel sixty years ago by a Rev. Turnbull and lived there for many years before coming to Grimsby and Grimsby Beach twenty-five years ago to reside.

The bride and groom of that wedding, Mrs. Margaret Coburn, of Toronto, and Albert Hawkins, of North Bay, were present.

Their son, Ross Hermiston, of Stirling, and their daughter, Mrs. Norma Hatter, of Oak, were also present. One other son last his life in the First Great War.

Welcome

Last week the half century mark in births, since January 7th, was reached, at West Lincoln Memorial hospital. The birth listed below being the 50th child brought into the world at this institution.

May 11th—To George and Mrs. Curtis, Grimsby, a daughter.

I.O.D.E.

EMPIRE DAY PROGRAM
The Educational Committee of the I.O.D.E. have arranged a splendid programme to be given in the auditorium of the High School on Empire Day, May 23rd, beginning at 3 o'clock. The High and Public school students will be present. Girl Guides, Brownies and Scouts in uniform will take part in the programme and the speaker will be Mr. L. J. Pettit who will give a talk on "Empire Day." The school choir under the direction of Mr. Gordon Eaton will sing two numbers. An invitation is extended to the public to be present.

Women's Institute

The annual meeting of Grimsby Women's Institute was held Tuesday evening at the home of Mrs. Eli Deamer, Murray Street.

Officers for the coming year are: Honorary President, Mrs. G. Warner; president, Mrs. Wm. Layton 1st vice-president, Mrs. F. J. Burton; secretary and press correspondent, Mrs. H. Harvey; treasurer, Mrs. J. J. Graham; district director, Mrs. G. Warner; auditors, Mrs. A. Caton and Mrs. E. Wilcox; directors, Mrs. E. Kemp and Mrs. C. Marshall; pianists, Mrs. A. Caton and Mrs. H. Young.

Mrs. C. Norman was appointed hostess for the Health Clinics held in St. Andrew's Parish Hall to receive mothers and their children. She will be assisted by Mrs. G. Warner.

Mrs. F. J. Burton was appointed for immunisation, assisted by the Mother's Club. Delegates to the District Annual to be held in St. Catharines, June 12th will be Mrs. Wm. Layton and Mrs. H. Harvey. Mrs. F. J. Burton won the dresser set donated by Mrs. Norman. Mrs. Roy St. John won the prize for special draw—half a dozen small glass tumblers, donated by Mrs. H. Burton.

Mrs. L. Larsen will arrange with Mr. K. Griffith, principal of the public school, for the prize to be presented by the Institute for writing.

Mrs. Layton read parts of minutes connected with the sale of Seals for St. Catharines Sanatorium. Items read showed money spent for upkeep in various ways at the San until 1938, when all money was sent in to Central Council.

Mrs. C. Norman and her committee served refreshments at the close of the meeting.

The next meeting will be held at the regular time, the third Tuesday of June, at the home of Mrs. L. Larsen, who is the convener of the standing committee on Agriculture.

Anglican Appeal Now Under Way

Sunday, May 12th, saw the nation wide launching of the financial drive for the Anglican Advance Appeal. Special sermons in all Anglican Churches emphasized the immediate necessity for intensive effort on the part of all Christians to make possible, by the spreading abroad of a Christian way of life, a lasting and permanent peace.

Clergy and eminent laymen stressed the forward approach as highlighted in the allocation of the fund being campaigned for. Of the total objective of \$4,300,000 a sum of \$2,700,000 is to be set aside for missionary work. \$1,600,000 will be spent in Canada for the supply of clergy and buildings in the home mission field. \$150,000 will go to India for the medical mission in the Kangra District where new buildings and helpers are urgently needed; a like amount will go to China to meet the need of rebuilding and replacements. The sum of \$1,300,000 will be set aside to ensure that all missionary clergy will have a reasonable pension on retirement after a lifetime of service.

As stated by Mr. Stafford Roberts, Toronto Diocesan Campaign Organizer, "We have in the Atlantic Charter a promise of the Four Freedoms but these unfortunately are not the property of our Clergy." He said, "Freedom of Speech and Freedom of Worship they certainly have, but all too often they have neither Freedom from Want nor Freedom from Fear. It is the responsibility of the laity to ensure that those who are called to serve them should be assured of all Four Freedoms."

Tussy

Cosmetics Deodorant

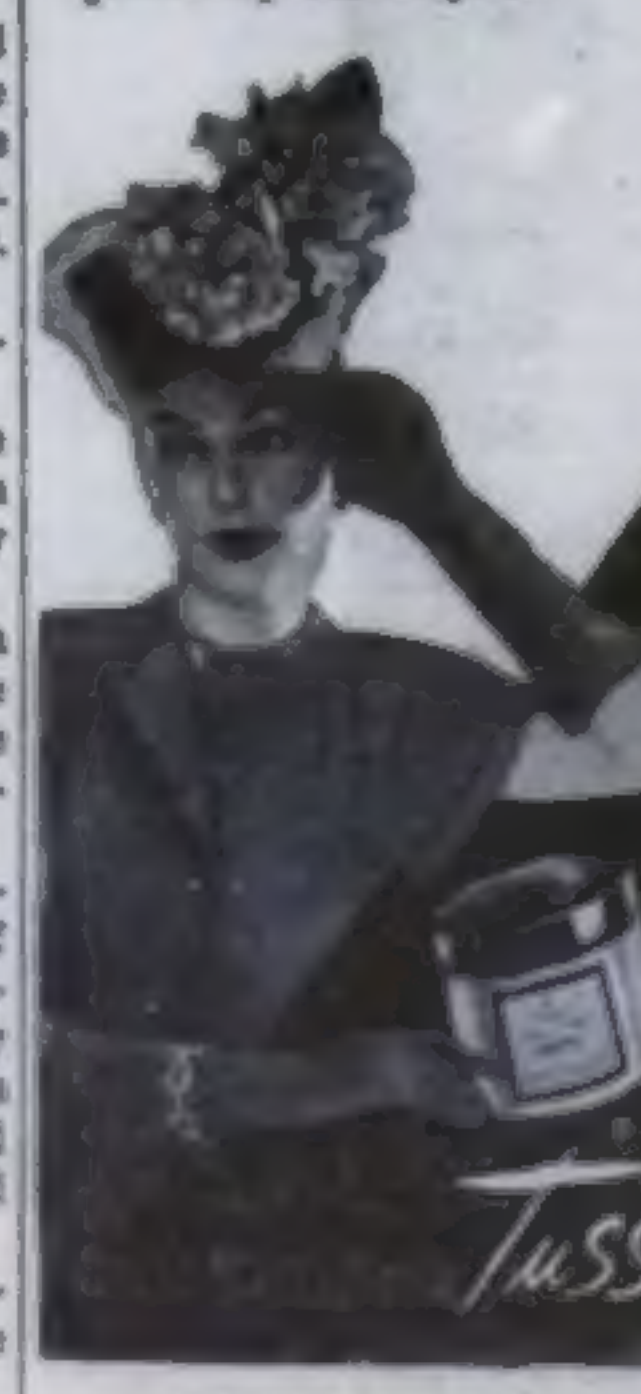

"DAISY FRESH"

REGULAR PRICE \$1

Sale Price...60¢

(FOR LIMITED TIME ONLY)

Lovely women depend on this famous cosmetic deodorant to guard their charm, their clothes. You will, too. Gentle to the skin and to the finest fabrics. Leaves a haunting fragrance. Stays creamy longer. Hurry to get your jar. This sale happens only once a year!

DYMOND'S

The Retail Drug Store

Telephone 69 — Grimsby

Eastern Star

A number of members of Grimsby Chapter No. 195, O.E.S., accompanied by several members of Dorcas Chapter, Smithville, chartered a bus for Kenmore, N.Y., where they visited Bethlehem Chapter. They were graciously welcomed by the Worthy Matron, Mrs. Daisy Shyer, and given a special welcome by the Worthy Patron, Mr. Paul Rueddt.

All enjoyed the entertainment provided at the close of the meeting, and the delicious refreshments which were served before they returned home.

Trinity Service Club

At their meeting on Tuesday, Trinity Service Club had the privilege of listening to a practical talk by Mr. J. R. VanHaarlem, of Vineland Experimental Station, on the subject of Home Canning. This created much interest, and many questions were asked and answered.

Members are carrying out arrangements for an all-day Rummage Sale to be held in the Masonic Hall on the coming Saturday, and have undertaken the catering in connection with the W.C.T.U. convention being held here the latter part of May.

Following the meeting tea was served by Mrs. Burton Bentley, Mrs. Kenneth Baxter, Mrs. Ernest Buchanan and Mrs. Archie Alton.

Social Activities At Village Inn

The members of the St. Catharines Garage Owners Association, to the number of 60 held a dinner meeting at The Inn on Monday night.

Mr. E. Seel and party of six, from Harrisburg, Pa., were weekend guests at this popular hostelry.

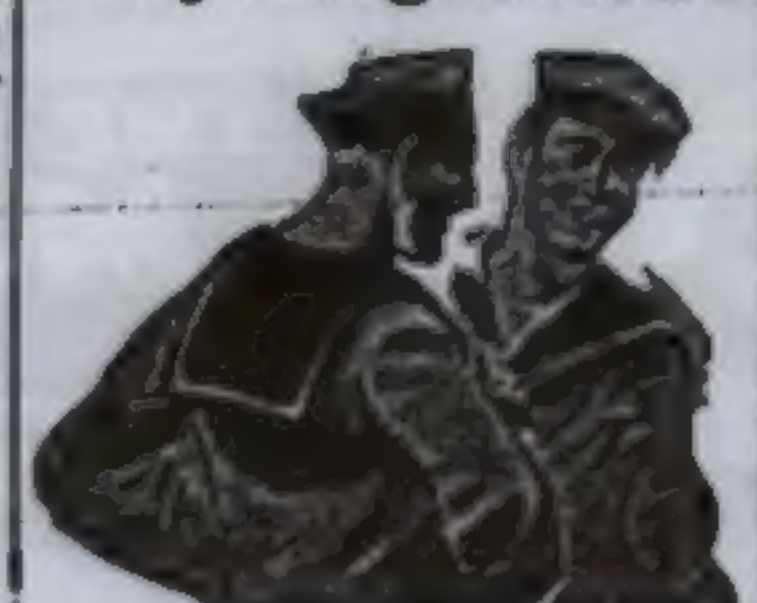

Mr. and Mrs. Wm. Todd, Pittsburgh, Pa., were weekenders.

Mrs. James Metcalfe, now 91 years of age, entertained a dinner party of six on Tuesday.

Mrs. Manos of Grimsby Beach, is entertaining a number of guests from out of town to luncheon this Thursday noon.

A grand holiday supper dance will be held in The Oak Room, on Saturday evening, May 25th, from nine until midnight. Phone for table reservations.

Navy League News

At the twenty-eighth Annual Meeting of the Navy League of Canada (Ontario Division) held on Saturday, April 6th, 1946, the following resolution was passed:

"THAT the Navy League of Canada (Ontario Division) in Annual Meeting assembled, place on record its deep appreciation of the services rendered by Chairman of Committees and all members of its Branches."

The Managing Secretary was instructed to write and tender the thanks of the Executive Committee for the support and co-operation received, all of which is gratefully acknowledged.

Very truly yours,
THE NAVY LEAGUE OF CANADA (ONTARIO DIVISION)
V. R. Ramsay,
Managing Secretary.

Vinemount News

The Annual meeting of the Vinemount Women's Institute will not be held on the regular meeting day Wednesday May 15th, owing to the death of Ronald Dennis, brother of the Secretary Treasurer, Mrs. Albert Oldfield. Date of meeting will be announced later.

Sincere sympathy from friends and neighbours to Mr. and Mrs. Dennis and family in the loss of their son and brother.

The last Women's Institute Euchre and Dance for this season was held in the W.I. Hall, Thursday night, May 9th, with a large attendance. The following were prize winners. Ladies, Mrs. R. Watt, Miss Carly and Mrs. Charles Kinch. Men, Ellis Jacobs, Harry Depow and J. D. Stuart.

Births

ATKINSON—Mr. and Mrs. Harold King Atkinson (formerly Audrey Robertson), wish to announce the birth of a daughter, (Judith Eleanor) May 10th, 1946, at the Mount Hamilton Hospital. Mother and baby doing well.

Legion L.A.

A full attendance was recorded on May 8, 1946, for the first meeting of the Ladies' Auxiliary of the Legion, Branch 127, including six new members who were initiated during the course of the evening.

The interest and willingness to help, from the members, signified that the Auxiliary could be a success. Part of the large program planned for the auxiliary has been started and a great deal of assistance will be necessary.

To anyone who has someone closely connected to them, who has served in either the first or second world war, we extend a hearty invitation to become a member of the auxiliary.

Beaver Club

The Beaver Club held their regular business meeting Monday evening, May 13, in the Church rooms, 25 members answered Roll Call, and two new members were welcomed.

Some business was attended to, then the president gave an amusing reading entitled "Church Music." It was announced that, the "Blacks" had won the Shuffleboard Tournament, which means that the "Reds" have to get busy preparing a banquet for the victorious team. All "Blacks" are asked to meet at the home of Mrs. Gerald Carson, Thursday evening, this week at 8 o'clock.

Kathleen Kidd In Singapore

Writing from Singapore, Canadian radio actress Kathleen Kidd, former Grimsby resident, tells of doing a broadcast in Batavia with Canadian actor Frank Wade, using a script written by Toronto producer-actor Earle Grey.

Visiting a place which used to be the largest distribution centre for rice in Burma she found it 100 per cent demolished. Only tents are erected "as far as eye can see."

Kathleen's entertainment unit played before black troops of African regiments. Food was bad in Batavia, she writes. "Strictly army rations, and poorly prepared." In Java there was shooting going on between the Dutch and Indonesians; a man was shot just as Kathleen was leaving the theatre one night.

Singapore, she writes, is normal compared to Hong Kong, but she can't get used to the odors. "The surrounding country is lovely, with good roads winding through native villages and jungles."

Homes are modern. It is very hot and humid, with tropical storms as regular as clockwork. She wasn't sure when she returns to Toronto.

St. John's W.M.S.

A Sectional meeting of the Presbyterian W.M.S. was held in Stoney Creek, Presbyterian Church, on Thursday, May 8th. It was well attended by representatives from Beamsville, Grimsby, Hamilton and Stoney Creek auxiliaries.

Mrs. Andrew Stevenson, District President was in the chair and Mrs. C. H. Prudhomme acted as secretary. Mrs. Alex. Skene, Stoney Creek, welcomed the visitors. Taking part in the Worship Service were Mrs. C. A. McArthur, Beamsville, Mrs. F. McAvoy, Grimsby and Mrs. Stuart Woods, Beamsville. Mrs. Duncan McIntosh, Grimsby, was pianist. Mrs. Donald Munro brought greetings from the Presbyterian. Mrs. Alex. Skene was appointed District Secretary for a two year term.

Mrs. A. W. Pae, Toronto, who is an executive of the Presbyterian Council and Secretary of Indian Missions, gave a most stirring address. Mrs. Pae is an outstanding speaker and gave a graphic account of how different missionary projects were organized and carried on in Canada and overseas countries. Two vocal solos were beautifully rendered by Mrs. John Finlay of Hamilton.

Mrs. C. H. Prudhomme, Beamsville, Mrs. Prudhomme, Jr., Beamsville, Mrs. Alex. Skene, Stoney Creek, and Mrs. W. J. Morris, Grimsby, gave encouraging reports from their respective groups.

Departmental Secretaries who spoke were Mrs. A. D. Poole, Presbyterian Treasurer, Mrs. F. I. Galbraith, Dundas, Mrs. W. H. Fuller, Jarvis, Mrs. F. Duval, Burlington and Miss M. B. McQuesten, Hamilton.

The offering was dedicated by Mrs. John Dick, Grimsby. At the close of the meeting refreshments were served by the Stoney Creek ladies. Mrs. W. J. Morris moved a vote of thanks to the speakers and to the Stoney Creek Auxiliary for their hospitality.

Christening

GRANDDAUGHTER OF THE
LATE MAGISTRATE JAMES
EDMUND JONES

On Sunday, May 5th, by the Rev. Canon Leonard A. Dixon, at St. Clement's Anglican Church, North Toronto, in the presence of 85 friends and relatives, Baby Elizabeth Esther Denison, 9 months old, was baptized. She is the second granddaughter of Mrs. Denison, formerly of Grimsby, and the late Jack Denison, of the old Lincoln and Welland, who fell in France in 1916, and daughter of Mr. and Mrs. Linton Denison, of 181 Dawlish Ave., Toronto. For the ceremony she wore a hand-made lace gown, created over 75 years ago by two great aunts in England, and worn as a christening gown by both her mother and maternal grandmother, and most of her sixteen first cousins.

Baby's middle name, Esther, is after a United Empire Loyalist ancestress who remained alone with her babies in the woods near Muddy York (Toronto) while her husband and male relatives fought at Queenston Heights, one picking off the sharp-shooter who killed General Brock, and another firing the cannon from the battery that sank at midstream a scow loaded with the enemy, drowning them to a man. Alone in the woods with her two babies, she kept the fireplace burning brightly every night to prevent wolves from breaking in through the window from a stump around which they would howl all night outside.

On Saturday, May 11th, a reception was held at Baby's home, to which were invited all who wished to see her. In spite of the rain, more than 100 arrived. Old Grimsby people who came in during the afternoon and evening were Mrs. Provost Congrave, Miss Constance Talbot, Mr. and Mrs. F. P. Macklem, well-known singer. The Dickens Fellowship of Toronto, the teaching staff of St. Clement's School were well represented. Miss Lillian Nellies of the Mt. Pleasant branch of that well known pioneer family was also present.

Obituary

DOROTHY ETHEL WILCOX

Dorothy Ethel Wilcox, of Grimsby Beach, died at the residence of her sister, 735 1/2 Cannon street east, Hamilton, on Sunday.

Born in Grimsby Beach, she had only been in Hamilton for five weeks. She is survived by two brothers, Robert A. and George, both of Grimsby Beach; a sister, Mrs. William Lay, of Hamilton, and three nephews, Alec, of Detroit; Lorne, of Toronto, and Jack, of Grimsby Beach; also a niece, Margaret, of Montreal. She was a member of the Grimsby Baptist Church.

MRS. ANDREW CLOUGHLEY
A resident of Grimsby for the last 45 years, Mrs. Andrew Cloughley passed away at her home, 34 Robinson street south, on Sunday, after a lingering illness.

A daughter of the late Mr. and Mrs. Alex. Moore, she was born at Winona. She was a member of Trinity United Church and had taken an active part in the women's organizations of that church. She was a member of Lincoln Loyalist Chapter I.O.D.E.

Surviving, besides her husband, are three sisters and two brothers. Mrs. Albert Kirk, Hamilton; Mrs. Flora Boden, Stoney Creek; Mrs. Elmer North, Beamsville; Thomas Moore, Winona, and William Moore, Grimsby.

Funeral services were held on Tuesday afternoon from the Stonehouse Funeral Home, Rev. W. J. Watt officiating, assisted by Rev. Stanley Kirk of the Anglican church, Milton, a nephew of the deceased. Interment was in Queen's Lawn cemetery.

Coast bearers were J. O. Moore, Alfred Dow, James Dunham, Edw. Sullivan, Edw. Mariow and Ernest Tomlinson.

Visiting Hours At The Hospital

Visitors to West Lincoln Memorial hospital are reminded that they must observe the visiting hours at this institution. The set hours are as follows:-

Ward and Semi-Private:- 2 p.m. to 4 p.m.; 7 p.m. to 8 p.m.
Private Patients:- 11 a.m. to 9 a.m.

Maternity Ward:- mother and husband of patient only; 2 p.m. to 4 p.m.; and 7 p.m. to 8 p.m.
No children under 12 years allowed to visit.

Request Sanitary Regulations

Lincoln County Council will be asked by the St. Catharines-Lincoln Health Unit to adopt sanitary regulations to assist unit inspectors in enforcing sanitary and health matters.

This was decided at the May meeting of the unit held last Wednesday. Roy Saunders, Beamsville, a member of county council, was asked to discuss the matter with council at their next session.

The report of Dr. D. V. Currey, M.O.H., revealed that the unit nursing staff devote their efforts to a variety of interests. A total of 2,118 hours were spent by nurses on the following type of service: school visits, 63 1/2 hours; office calls and work, 44 1/2 hours; home visiting, 67 1/2 hours; clinic work, 259 1/2 hours, and miscellaneous visits, 120 hours.

Will Discontinue Berry Subsidies

The Agricultural Food Board has announced it no longer would pay per pound subsidies to producers of berries used for jam making and canning.

The board said subsidies which have been paid to producers of strawberries, raspberries, loganberries, boysenberries, gooseberries and currants when used for jam making and raspberries for canning purposes will not be paid for the 1946 crop.

Instead, the board said, the Prices Board will increase ceiling prices on jam and canned raspberries of the 1946 crop by an amount equivalent to the growers' subsidy applicable in 1945. This would permit processors to pay to suppliers prices for raw fruit equivalent to the total prices including subsidies that were paid last season.

Foresight

is indispensable for security. Never in history has it been so necessary to take care of tomorrow with the resources of today. And that is exactly what you do when you become a policyholder of the

New Plant Operating OVER 50 POTTERY ITEMS NOW BEING MANUFACTURED HERE

The Lincoln Pottery which is located in Beamsville, using the site and building occupied by the Niagara Rubber Company, has started on production, and with a staff of fourteen, the fifty odd articles which they will manufacture will now run in an ever increasing number from their assembly line kilns.

For the most part, articles made at the Pottery, are the odd little articles that adorn nic-nac mantels, and in general are widely used to decorate the homes of Canadian citizens.

From these fifty items, three are for practical purposes, these include cream and sugar sets, pepper and salt shakers, and vases. It is remarkable to see powdered clay, which is imported from the United States, mixed with other substances, which need not be mentioned, made into a liquid and poured into moulds from which emerge the many beautiful and delicate items manufactured at Beamsville.

The actual process includes the pouring process into the moulds, this is allowed to set for fifteen minutes.

The dumping process follows, and

moulds are allowed to drain and set for another half hour, when the item is removed from the mould, and can be finished immediately. Placed in the stillyard to dry, before being decorated or dipped, from this emerges the finished product after the firing process.

This ornamental, decorative art ware is made up in over fifteen different shades of under-glazing, and although the Beamsville plant does not manufacture all the hundreds of items that can and will be made, the variety is very great and of a high calibre in this type of work.

The Lincoln Pottery is entirely separate from Cayuga Pottery which is located at Ithaca, N.Y., although Mr. H. C. Jones owner of the Cayuga plant, is President of the Lincoln Pottery. Mr. Arthur Dewey of Toronto is Vice President, and his son George Dewey is Secretary Treasurer, and is in charge of the Beamsville plant.

George Dewey will reside in Beamsville, and we wish him every success and trust that Beamsville will provide not only a pleasant home for him, but an adaptable location for the industry which has been brought to the Village.

Work Is Started On New Fire Hall

At a meeting of the Fire Committee, with Chairman Frank Laundry officiating, it was decided to go ahead immediately with the erection of a new fire hall, dimensions to be forty by fifty feet.

C. Lumley, local contractor, has been awarded the job, and is preparing plans for the erection of this building, which is badly needed in the Village.

The structure will house a police office, and two cell accommodations, a fire hall and firemen's quarters downstairs, the second story will feature a hall with kitchen accommodations at the rear or east end of the building. Cement block and brick will be used, and excavation commenced yesterday, when the County Shovel arrived.

Whether or not it will be called the Beamsville Memorial Fire Hall, as tentatively mentioned at a Council meeting last month, remains to be seen, but one thing for sure, the Village is going to have a Fire Hall.

Trinity United

Rev. Murdoch Mackinnon of Orangeville was the guest speaker at Trinity United Church, Beamsville, on Sunday, and Rev. W. C. Almack attended the Orangeville Church.

Rev. W. C. Almack will be leaving his Beamsville pulpit in a short time but to date no definite appointment has been made to fill his place at Trinity.

Nowadays it seems people discuss the economic system of the country without ever mentioning economy.

the Beamsville and District Lions Club.

For a man who returned from four and a half years overseas in World War I, shell shocked, gassed and twice wounded, this is a pretty enviable achievement, and well deserving of the rest Stan is going to take.

His summer home at McNab is going to see a lot of him this summer, a new boat, plenty of fishing tackle and the apple of his eye, his son Bruce, and what a summer.

"I'm gonna learn to know my son better, and so help me, I gotta impress on him two things. Don't be a Doctor, or a service station operator." The very best, Stan.

Stan Gibson Retiring OPENED THE FIRST COMPLETE SERVICE STATION IN LINCOLN

June 15th, 1946, is going to be a great day for Stanley L. Gibson. On that day Stan will pack up his tools, and leave the Imperial Oil Station at Beamsville after twenty seven years of dishing out petrol, fixing cars, and dragging in wrecks.

Twenty-seven years in the garage and service station business gives a man a lot of time to study people, and Stan figures that he could qualify for a degree in Human Nature, or perhaps more aptly termed, the attitude of people who find it necessary to engage the facilities of a garageman.

For instance, there is the type who insists on blowing his horn, requesting immediate service, when a man is flat on his back under a car. "This type is irritating to say the least," says Stan. Then there's the fellow who thinks he's gonna be gyped as soon as he steps in the garage, and there are lots more said the man who started the first actual service station in the County.

This was at the corner of Bond and St. Paul Streets in St. Catharines, and although there were curb pumps, service stations as we know them were an unknown quantity. Gas sold at 18 cents a gallon in those days, and Model T Fords were all the vogue. The usual order being five gallons of gas and a quart of oil. The first shipment of Imperial gas was delivered to Stan in a tank hauled by horse.

After getting this station functioning properly, Stan moved out the district opening up other stations, and finally ended up in Merriton, where he not only operated a service station, but was Captain of the Merriton Fire Department, and Chief Engineer.

Sixteen years ago this coming November, Stan moved to Beamsville, and took over the station formerly operated by Pete Robertson. During those sixteen years he has maintained the fine Imperial Oil Service Station at the corner of Ontario and King Street's, under one of those signs which says—Stan Gibson—Lessee.

Always a specialist of Stan's has been highway accidents, and in his career, he has handled hundreds, both the minor and fatal type. The Highway No. 8 of old was pretty famous for its bad accidents, and during his sixteen years here, he has handled most of the worst accidents on Ontario highways in this district, and recalls a winter's night when no less than sixteen calls came to him for assistance. This particular night, a big Firemen's Dance was being held in the Community Hall, and a sheet storm whipped up to make the roads resemble a skating rink. Stan took off his "go to meetin' clothes," and got out the wrecker, and with the assistance of firemen from Merriton and Beamsville worked throughout the night clearing up accidents.

Being a qualified St. John's Ambulance man, Stan has often given assistance to Doctors and Traffic Officers at the scene of an accident. Tragedy has presented itself to him on many occasions, but only once did an accident victim imprint its horror on his mind. To a man who loves kids as Stan does, we can understand how a three year old girl whose blonde curls

were cloaked with blood and decapitated from her tiny body, would make a man stop and think.

But all is not on the macabre side. Take for instance the time he pulled a horse out of a cellar. Always good for a horse laugh.

During his stay in Beamsville, Stan has played an important part with the Beamsville Fire Department, serving as Captain for some time. When the A.R.P. was functioning, Stan was Fire and Police Controller for the district. And his pet project at present is the need for increased help in night conservation, and aid to the blind. This is Stan's big item as he is Chairman of the Sight Committee with

IN ORDER to strengthen the arm of the Church and enable it to meet the challenge of postwar needs with intensified effort at home and abroad, members of the Church of England in Canada are asked to provide the sum of \$4,300,000.

This money is urgently needed to carry on the Church's educational and social work in Canada.

To meet Diocesan and general synod needs as well as the expenses of organization and administration.

To carry on missionary work at home and abroad, to assist the Mother Church in England and the Churches of Europe in their work of rehabilitation.

To strengthen the pension fund for missionary clergy.

The money will be allotted in the following way:

Pension Fund	\$1,300,000
Missionary Work	1,400,000
Educational Work	100,000
Social Work	55,000
Church in Britain	100,000
Churches in Europe	90,000
General Synod Administration	205,000
Extension of Church House	50,000
Diocesan Needs	800,000
Organization and Administration	200,000

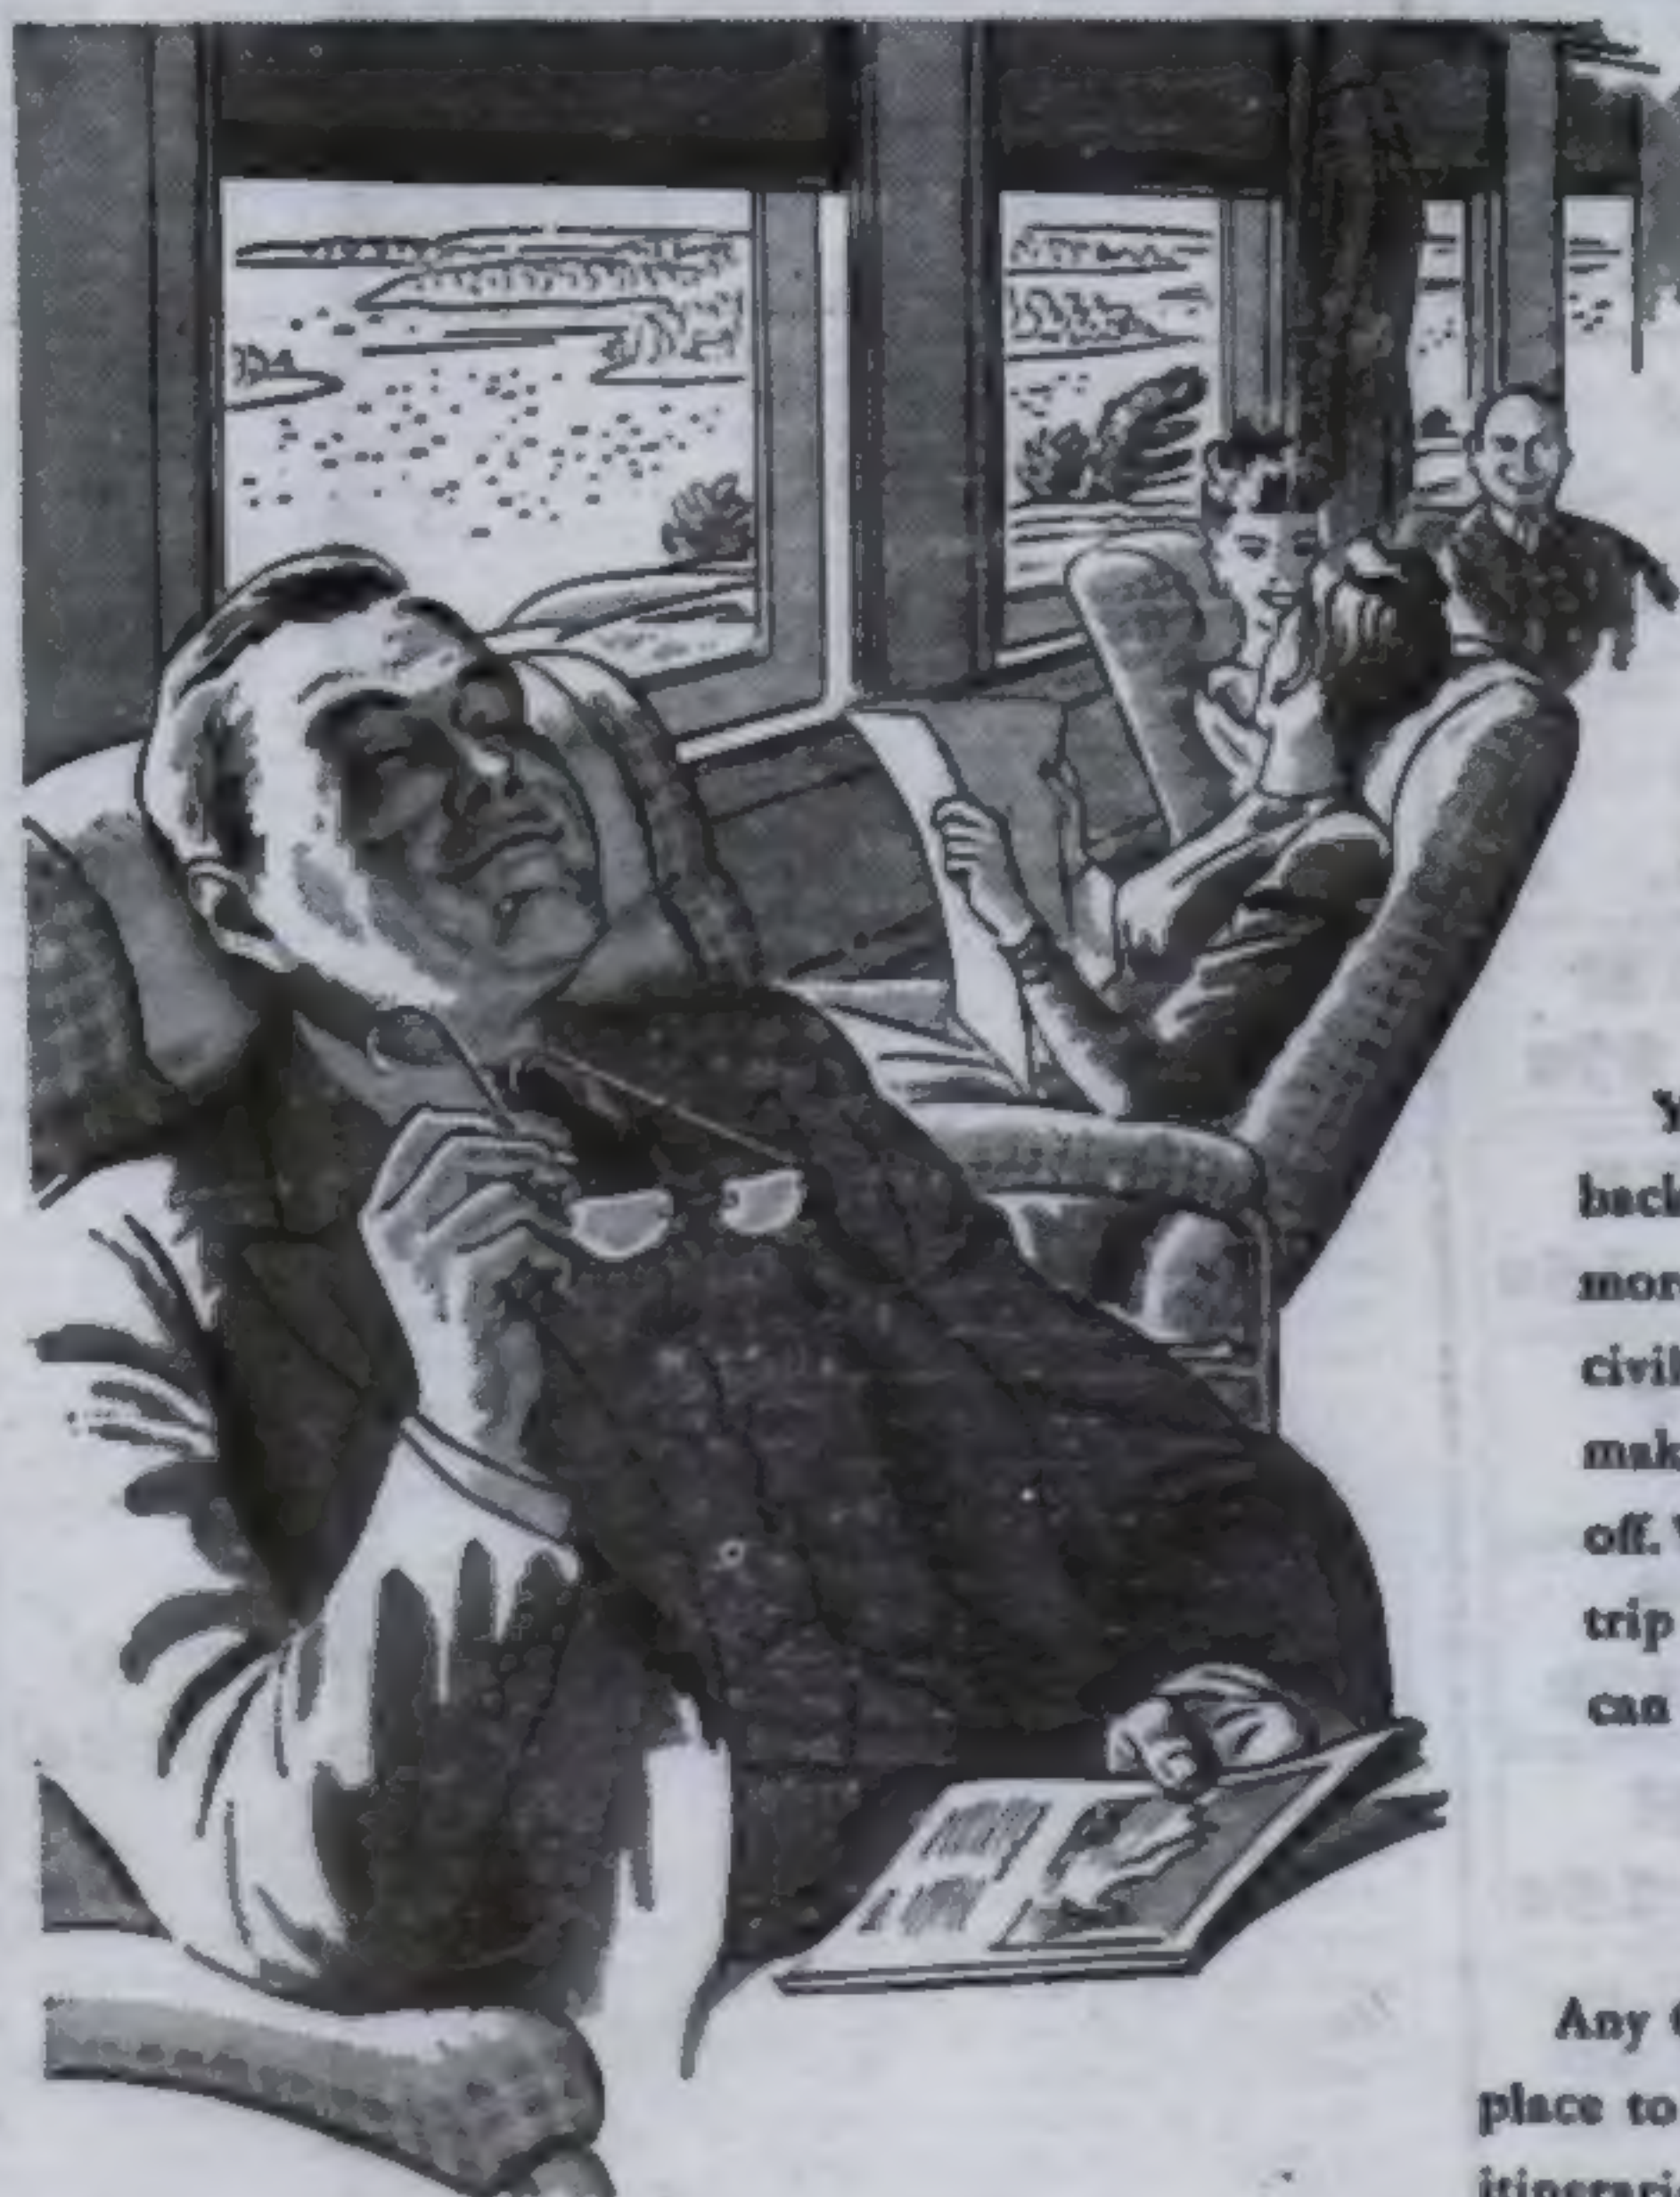

Spiritual re-dedication must bear fruit in self-sacrificing practical endeavour if the Church is to meet its Christian obligations.

Be prepared to lend YOUR support to the limit of your ability when the Visitor calls during the week of May 12th to 19th, or mail your offering to your Diocesan Headquarters.

Beamsville News

News From BEAMSVILLE High School

by Little Whizit

Cadet inspection is only one week away, and we are all hoping for some time off during school hours to practice. We sure need it. Girls especially. The following officers were selected last week for the girls corps. Lieutenants — Barb. Robb, Ruth Perkins, Jocelyn Foster, Shirley Vanharlem. Sergeants — Jean Blackmore, Joan Davidson, Marjorie Warner, Janet Sutherland.

Little Whizit feels a big foud coming up between West Ave. and William Street. Gee, mon do cause a lot of trouble, especially the city type.

A couple of sisters on King Street, entertained two Grimsby guys on Sunday afternoon. Their thoughts may have been hovering around the cadet dance situation.

Time's short.

The gruesome foursome were on the loose again. Poor Cy, its really too bad your vehicle broke down—they do it at the damdest times. A little more practice wouldn't hurt Willie anyhow. Club Henley was the objective on this escapade. And speaking of the Club—I hear Junior tried to take the C. H. waitress out for a Sunday afternoon drive. Too bad she was otherwise pre-occupied. Aw c'mon Cuddles give the kid a break!

Not one but two of our teachers are sporting diamonds. My, but how they sparkle. Believe it or not, all the students are really going to miss these two instructors of higher learning.

That's about all for this week. "Boss man McGregor, says that space is limited, so see you next week.

Beamsville W.I.

The Community Hall, Beamsville, will be the scene of a meeting called by Mrs. C. S. Rickers, President of the Lincoln County Women's Institute, for the purpose of hearing addresses by Miss Ferguson and Miss Smellie of the Victorian Order of Nurses.

The meeting scheduled for Tuesday night, May 21st, at 8.30, will hear these two nurses outline the work and records of the V.O.N., in the hope that the system might be adopted in Lincoln County.

The annual meeting of the Beamsville W.I. is scheduled for the same afternoon, and election of officers will be the most important issue.

Shower

The residence of Mrs. James Mowat, Lincoln Ave., Beamsville, was the scene of a tea given in honour of Miss Jessie Mowat whose marriage takes place next month. The affair which was held on Saturday afternoon was attended by around forty friends, and the pleasant atmosphere was augmented by a lace-covered table with tall pink tapers, centred by a profusion of sweet peas.

Mrs. A. Allison and Mrs. David Stiven presided, assisted by Mrs. Harland Stewart, Miss Marion Book, and Mrs. E. McArthur.

Among other guests present, were Mrs. M. McLean, Miss Ellen McLean and Mrs. E. Smith all of Hamilton.

Lions Club

The first meeting for May of the Beamsville and District Lions Club, was held on Monday night in the Kitchenette, and the large attendance was presided over by Chief Wilfrid Richardson.

Extremely complimentary and successful reports were read on the success of the recent Zone Meeting which was held in Beamsville on April 24th.

Lion Dr. Charles Wray presented the Lions Service Chevron to Dr. Harold Latham. This award is made to Lions who have served in the armed services.

Lion Ralph Richardson introduced the guest speaker, Lion Stan Organ, manager of the Dominion Bank at St. Catharines. Lion Organ gave a delightful and informal talk on his recent trip by air to England.

The rush trip from Montreal via Goose Bay, to Prestwick, Scotland, in a 63,000 pound Lancaster transport was a real thrill, stated the speaker, and the efficiency, timing, and courtesy was a masterpiece of achievement.

The Trans-Atlantic crossing was smooth and uneventful, following the 54th Latitude at an altitude of nine thousand feet, and the landing in Scotland was precise according to the time announced while still eight hundred miles over the ocean.

Although his stay was short, the speaker made many tours, and arrived at conclusions which are enlightening to us here in Canada. The shortage of food, is acute as far as actual luxuries are concerned, but good substantial food is not in short supply. The speaker termed the diet of Britons as "monotonous."

The speaker concluded with a tribute to the morale of the British people, and told of their intense gratitude to Canadians for the work and assistance they have given, and are still giving.

Stuff 'Round Town

by GORD MCGREGOR

Bob Gillespie, eldest son of Mr. and Mrs. Bert Gillespie, has joined the staff of the Bell Telephone Company at Hamilton, and commenced his duties on Monday of this week. Bob has just recently received his discharge from the army.

Saturday's rain was a million dollar affair, according to a bunch of fruit farmers in the district. With blossoms apparently setting properly, and now with moisture from the heavens, what will farmers gripe about next?

Final preparations have been made for the big servicemen's "do" on June 7th. Last Saturday letters were forwarded to some three hundred and thirty men all over the country, and already several replies have been received stating their intention of making the trip to the old home town. Horace Lapp his ork, and his entertainers will be the highlight of the occasion.

A car driven by Joseph Pancer of Toronto, is alleged to have left the pavement and struck a light standard on the Queen Elizabeth Highway at 1.30 Monday morning. Two other passengers including Mrs. Pancer, and Miss Lena McLure, also of Toronto, escaped serious injury, although Miss McLure received a severe laceration to the head. The car was badly damaged, and the occupants were rushed to the office of Dr. McIntyre at Grimsby for treatment. P.C. Ted Hope investigated.

Perhaps we have not heard the last of the wig-wag at the C.N.R. crossing at Beamsville. A check of traffic using the crossing is being made over a forty-eight hour period, and the figures are rather enlightening, as compared with the check made in March three years ago.

Figures used herein are not official, but one of the checkers said that approximately five hundred vehicles crossed over the main line of the C.N.R. in a twelve hour period on Tuesday, May 14th.

In the recent discussion of this matter, at Beamsville Council, it was felt by some members that very few Beamsville cars used this crossing, stating that Clinton township residents were by far in the majority. This is not exactly true, for a large number of Beamsville vehicles do use this outlet to the Queen Elizabeth.

Other figures show that twelve trains pass through in a twelve hour period, which would average out at one per hour. Naturally this figure would apply to all the other crossings between Hamilton and Niagara Falls, and its not easy to understand why many other crossings are signal equipped, and the Beamsville crossing is not.

Does the Vineland town line, or Park Road at Grimsby Beach, or even the Grimsby crossing, which all have some system of signals or gates run any more than five hundred vehicles in a twelve hour period? We think not. (Depot street crossing in Grimsby has checked as high as 150 vehicles in one hour in heavy fruit season—Ed.)

Are the lives of Clinton township or Beamsville residents not as valuable as the lives of people of other centres? We think they are. For seven hundred and fifty bucks for installation, and a maintenance cost of forty or fifty dollars a year, Beamsville Council should knock the thing in the head, which they have successfully done. Leave it up to the railway, they'll erect it on their own. Perhaps they will.

Will certain members of Beamsville Council have a clear conscience if a fatal accident occurs at the crossing? Answer—Yes, if it's a non-resident of Beamsville. After all what's Clinton to Beamsville. Answer—it's life's blood, that's all.

Things are returning to normalcy. They have resumed talking about swimming the English channel.

It seems everything has improved about the average school boy except his spelling.

CONTINUATIONS From Page One

NEW BOCK PLANT

treated with liquid which accelerates the drying process and days of time are thus saved. By using this liquid it is only necessary to keep the blocks in the drying building 24 hours when they can be moved outside for sun drying which requires three days when the blocks are ready for building purposes. The plant is now turning out between 900 and a 1,000 blocks a day.

Besides cement blocks the firm are also making plain and colored flagstones for sidewalk and other purposes. As well, they also contract for the construction of septic tanks, cement sidewalks, cellar floors.

WAR MEMORIAL

On motion of Mitchell-Alton, a vote of thanks was tendered to Andy Clarke for coming to Grimsby to make his Neighbourly News broadcast on Blossom Sunday.

Road Supt. Thos. Mackie reported that approximately 600 yards, or 150 tons, of crushed stone had already been taken out of the township quarry for road purposes. At least another 400 yards will be quarried and crushed.

It is questionable if council will make any further moves, for the present, toward rebuilding the Woolverton mountain road, owing to the excessive cost. Three tenders were received from three different contractors, but council took no action on them, as they felt they were all too high. King Paving Co. want \$13,200 for the job; Cope and Son want \$13,650, while Wallace A. Mackay of Weston would do certain portions of the work for \$7,463.

Council received a petition from Central avenue, Grimsby Beach, asking that drainage be constructed on that thoroughfare. Road Supt. Thos. Mackie will take care of the matter.

W. R. Thomas of Salfleet township, came into North Grimsby on April 15th, and shot a fox. Council paid the bounty of \$5. The fox was killed on the farm of Jas. Stewart, at Grassie.

West End Water System used 200,000 gallons of water in April; East End System used 1,010,000 gallons.

Council granted a building permit to Harry A. Tuer for the erection of a stone and veneer house on the corner at Park Road and No. 8 Highway, near Park Road corner at a cost of \$7,500.

George Hohnstern was granted a license to operate a dance hall at Grimsby Beach, provided it is properly run.

Grimsby Mountain Baseball Club was granted \$25.

Council granted \$10 for a membership in the Ontario Assessors Association and instructed Assessor Gordon Metcalfe to attend the association convention on June 13-15.

Philip McIntyre has set-up a junk yard on the North east corner of Grimsby-Smithville stone road and Grimsby Centre road, without a permit. Council is giving him until May 31st to clean up the place.

Councillor Sam Bartlett wants more light at Grimsby Beach, on Park Road, nearer the C.N.R. tracks. The light will shine.

Council will provide enough stone to Geo. Fair, Supt. of Grimsby Beach, to build a surface on the Main road through the Beach property.

MUSIC FESTIVAL

under Miss Ruth Walker's tutelage caused one's ears to wiggle with delight.

Something new to the Festival was the whimsical Chinese play, "The Stolen Prince," in the traditional Chinese manner and in authentic costume, directed by Mrs. Deta Cole. Public school children were the actors and actresses.

Schubert's "March Militaire" was chosen by Evelyn and Catherine Uren for their piano duet and charmingly executed. Soloists Mary Crich in "April Rain" and Donna Rahn in "June" made a pleasing impression with songs well suited to their soft, tuneful voices. Bert Buckingham who had scored a hit as the humble Property Man in the Chinese play, also proved his talent as a vocalist in his solo, "Where Go the Boats." Don Gardham's cornet solo "The Rosemary" was well received and deserves special mention as a fine piece of work.

Children from Thirty Mountain, Grimsby Centre and Grimsby Mountain schools covered themselves with glory in two happy songs, "The Merry Peasant," and "The Three Huntsmen,"—a Welsh folk song.

A group of children from Grades III and IV were put through their paces by Miss Agnes Humphries in four sprightly numbers, "Hammer Song," "Morning," "Clocks" (an amusing round), and "Dancing Song," all very smoothly done.

The Junior Chorus, directed by Mrs. Ann Monk, came forward with three bright little songs, "Robin on My Lawn," "The Sandman," and "The Little Pig," which pleased everyone, including the

small vocalists themselves.

The mixed Senior Chorus in the four-part songs, "Shades of Evening" and "Ten Little Indians," presented by Director Eaton, demonstrated the manner in which the adolescent boy is eased over that uncomfortable period when he is shedding his juvenile soprano and has not yet settled into the maturity of tenor, bass or baritone.

Graceful motion and vivid colour characterized the lively Folk Dance by 18 high school girls under the direction of Miss Irene Morgan.

Directed by Mr. Eaton, the High School Choir gave a fine song of the sea, "Trade Winds" following it up with the animated "Czechoslovakian Dance Song." Then the concert swung into a triumphant climax in a massed chorus in which the choir of 150 voices was augmented by the High School Glee Club and members of the Young Men's Chorus, the latter making their first appearance after several war years. The closing songs were the Welsh "All Thro the Night," Italian "Funiculi, Funicula," and finally the most fittingly, the stately "Netherlands Hymn of Thanksgiving."

More than 500 children from the associated schools of Grimsby and district, together with assisting artists, took part in the Festival with that attention to detail which assures perfection and—under the baton of their beloved Director of Music, G. L. Eaton,—again achieved a well-balanced and wholly satisfying program.

A Thousand Pork Chops On Hoof

The largest collection of walking pork chops ever seen on the screen makes its appearance in the Rodgers and Hammerstein II musical film version of "State Fair," the 20th Century-Fox Technicolor his showing at the Roxy Theatre the first three days of next week. Seven prize-winning pigs were bought outright to play the pri-

cipal porcine roles, among them an 850-pound prize Hampshire boar for the part of "Blue Boy" and a 700-pound Duroc for "Emeralda." Thirty four other hogs were rented for atmosphere.

"State Fair" is based on Philip Stong's novel of the same name.

A liberal is the fellow who will give you the shirt from another's back.

Will Make Survey For Air Field

The Air Services Division of the Department of Reconstruction, Dominion Government, has ordered an immediate survey and investigation into the need and location of a government-managed airport in the Niagara Peninsula. Mayor W. J. Macdonald of St. Catharines said on Saturday.

The mayor, a member of the Niagara Peninsula Inter-Municipal

Airport Committee which conferred at Ottawa yesterday with Reconstruction Minister C. D. Howe, said the department's request for establishment of a major airport in the peninsula had been promised "full consideration."

Human nature is what makes a man wait until stocks reach a new high before he buys them.

Many a man puts his foot in something he doesn't like in order not to appear as a fool.

BREVITIES

EVENTS and TOPICS of the WEEK in TABLOID

County Council meets next Tuesday.

Lions Club meets next Tuesday night.

Legion Sports Day, May 24th, in Grimsby.

Port Erie tax rate is 40.6 mills an increase of four mills.

Big Legion dance, Grimsby Arena, night of May 24th.

Saturday is Salvage Collection Day in the town and township.

Grimsby Fire Department will hold its big Carnival and Street Dance on August 8th and 9th.

Port Dalhousie tax rate has been struck at 45 mills for public school purposes and 47 mills for separate schools.

A crew of Canadian National Telegraph Co. men are working east and west out of Grimsby re-erecting poles and cross arms.

Some time late Monday night, or Tuesday morning, vandals broke down the stone pier and steps from the iron railing on the west side of the east steps of the Post Office. Police are investigating and have a clue to the culprits.

Bortram Webster has installed a pair of iron stair railings on his Kerman Ave. house, at present occupied by a tenant. These railings were designed by Mr. Webster and contain a pair of music lyres. Further improvements will be made to his property.

There were 107 births in St. Catharines in April, the largest number of births recorded since December, 1944, when the total was 119. In a report released the vital statistics branch of the city clerk's department reported 57 resident births, and 50 non-resident. Deaths during April numbered 29, 21 of which were residents. Marriages for April exceeded an average of one per day, a total of 37 being performed during the month.

Ten applications for pensions were discussed at last Thursday's meeting of the Lincoln County Pensioners Board. The Board recommended that eight be granted and that one mother's allowance be granted. One application was laid over for further investigation. Present at the meeting Thursday were: Chairman, George Hedley; George Montgomery, W. H. Sheppard, Mrs. C. E. Groce, Miss Marie Tremblay, appointed to succeed Mrs. T. Wilcox who resigned this spring, and Secretary Miss Jean Davidson.

Will Collect All Salvage Saturday

Are you ready for the salvage collectors on Saturday. Have all your paper and magazines bundled, all old iron and other scrap including bottles placed out at the curb or roadside early in the morning and the collectors will pick it up.

Canadian Legion members are collecting this drive for salvage and scrap of every kind is badly needed. Some time through the day a Legion truck and crew will cover every street in town and every road in the township so have your contribution ready when the truck comes along.

Don't forget Saturday is Salvage Collection Day.

Come And Get Your Mail Box

When application was made to the Post Office Department for the establishment of a rural mail delivery in the west end of the township, below the mountain, more than the required number of 50 per cent of the residents on the proposed route signed the petition.

The Department has granted the request of the petitioners, but the route will not be established until they all come to Grimsby Post Office and sign for and receive their metal mail box.

To date there are still about 30 of these residents who have not picked up their box. They should do so all once.

REAL ESTATE

Pettit and Whyte agency, last week sold the home of Thomas Sawyer, on the Fairview lake front to Mr. and Mrs. John Globe of Steep Rock, Northern Ontario.

Lt.-Col. Fred Kemp has purchased the fine home and grounds on No. 8 Highway, just east of Nelles Road, from the John Gillespie estate, through the Pettit and Whyte agency.

The C. J. Deslante agency has completed the deal whereby Wm. E. Halsey, R.R. 4, Mount Forest, purchased the house and lot on the corner of Park Road and Control Avenue, from George W. Crittenden.

In Memoriam

MASON—In loving memory of a dear husband and dad, Charles Mason, who passed away May 14, 1945.

Peacefully sleeping, resting at last His weary trials and troubles are past;

In silence he suffered, in patience he bore, Till God called him home to suffer no more.

Ever remembered by his wife, Fred, Lucy, Elsie and Barbara.

Seve Servicemen Arrive Home

Five from Western Grimsby men, one Centre, one and one from Calcutta day on added in Halifax on Monday overcame the de France from the war and arrived home during

Major The men were: C.E. Grimsby, E. B. Scott, R. C. Grimsby, of the Army hockey team that won the championship in England that Bill Hooker played defence on.

Pte. R. C. Mason, son of Charles and Mrs. Mason, Elizabeth street, Gr. G. K. Ramsey, R.C.A. son of Col. and Mrs. Ramsey, 106 Main west.

Cpl. J. D. Young, R.C.A.M.C., Winton.

Cpl. D. A. Campbell, R.C.A.B.C., R. R. No. 3, Calcutta Centre.

Lt. Ernie A. Stuart, R.C.A., Robinson street south.

Gov. G. F. Tremaine, R.C.A., son of Allan and Mrs. Tremaine, Ontario street.

In Memoriam

MR. GEORGE EDWARD BOLTON

"Gone from us but leaving memories"

Death can never take away; Memories that will always linger While upon this Earth we stay Somewhere back of the Sunset, Please God, just let him know That we down here do not forget, We love and miss him so.

'Tis sweet to know we'll meet again On that bright eternal shore, Where Christ will wipe away all tears— We'll meet to part no more.

Mrs. Bertha H. Bolton

War has changed from the old days. Now you defeat your enemies and then feed them.

A man has reached middle age when a circus poster doesn't hold that alluring charm which once upon a time it did.
